Riotous Deathscapes Hugo ka Canham, 2023-02-01 In *Riotous Deathscapes* Hugo ka Canham presents an understanding of life and death based on indigenous and black ways of knowing that he terms Mpondo theory. Focusing on amaMpondo people from rural Mpondoland in South Africa's Eastern Cape, Canham outlines the methodologies that have enabled the community's resilience and survival. He assembles historical events and a cast of ancestral and living characters following the tenor of village life to offer a portrait of how Mpondo people live and die in the face of centuries of abandonment, trauma, antiblackness and death. Canham shows that Mpondo theory is grounded in and develops in relation to the natural world where the river and hill are key sites of being and resistance. Central too is the interface between ancestors and the living in which life and death become a continuity and a boundlessness that white supremacy and neoliberalism cannot interdict. By charting a course of black life in Mpondoland, Canham tells a story of blackness on the African continent and beyond. Duke University Press Scholars of Color First Book Award Recipient.

Integrative Ophthalmology Ningli Wang, 2019-09-05 With the development of nature science and industrial technology, more and more patients are benefitting from the rapid progress in ophthalmology as the use of new medicine and delicate surgical therapy has ensured them the chance to restore their sight. However, some problems have come up during its development of which the most serious one is the limitation of the ophthalmology. Eyes are not isolated organs; they are connected to our body, and thus the general status of our body will affect the eyes' function. Therefore, it is of great importance that the ophthalmologists see the big picture while dealing with the clinical problems. Based on the above observations, we put forward the concept of Integrative Ophthalmology and describe the ophthalmology-related medical situations that are prone to be neglected in clinical practice in a bid to increase the awareness of doctors from all fields that a holistic view should be adopted in clinical practice and it is the patients that we are treating rather than the disease. There are 9 parts in the book containing the concept of integrative ophthalmology, intraocular and intracranial pressure gradient-related diseases and the relationship between the different general status and eye disorders. We do believe that the integrative ophthalmology is the key to the development of ophthalmology and hope readers can benefit from this book.
