Michael Gray,2016-10-12 We have an uneasy relationship with the relentless deluge of information gushing out of academia and our media outlets To turn it off is escapist but to attempt to cognitively grapple with it is overwhelming In Unforgettable Enabling Deep and Durable Learning a nationally recognized master teacher gives professors and their students the means to chart a clear path through this information explosion Humans crave explanatory patterns and this book enables teachers to think deeply about their academic disciplines to find and articulate their core explanatory principles and to engage their students in a compelling way of thinking An alternative title for this book could be Why the Best College Teachers Do What They Do

because the author articulates a compelling rationale that will equip faculty to create and deliver transformative courses. Students in transformative courses grapple with essential questions and gain mental muscle that equips them for real world challenges. *TEE for the 21st Century* David Burke, Richard Brown, Qaiser Julius, 2021-09-14 Theological education is at a global crossroads. Although many traditional programmes struggle to maintain student enrolment today's environment gives exciting opportunities to serve the global church in ways that are multi level accessible and educationally effective. TEE for the 21st Century utilizes missiological educational and sociological perspectives to explore theological education by extension. TEE as a powerful contemporary tool for equipping the global church for its global mission. Multi authored by a global team of discipline experts brought together by the Increase Association this book speaks to the real life training needs of today's church. Addressed to leaders teachers and practitioners it offers a robust framework for critically evaluating the impact of TEE on the formation of whole life disciples in a wide variety of contexts and locations. With a proven track record across Asia Latin America and Africa TEE has a role to play in the future of the church empowering every member to fulfil their God given calling to ministry and mission.

The unfolded protein response in virus infections. Shiu-Wan Chan, 2015-03-05 Unfolded protein response (UPR) is a cellular adaptive response for restoring endoplasmic reticulum (ER) homeostasis in response to ER stress. Perturbation of the UPR and failure to restore ER homeostasis inevitably leads to diseases. It has now become evident that perturbation of the UPR is the cause of many important human diseases such as neurodegenerative diseases cystic fibrosis diabetes and cancer. It has recently emerged that virus infections can trigger the UPR but the relationship between virus infections and host UPR is intriguing. On one hand UPR is harmful to the virus and virus has developed means to subvert the UPR. On the other hand virus exploits the host UPR to assist in its own infection gene expression establishment of persistence reactivation from latency and to evade the immune response. When this delicate balance of virus host UPR interaction is broken down it may cause diseases. This is particularly challenging for viruses that establish a chronic infection to maintain this balance. Each virus interacts with the host UPR in a different way to suit their life style and how the virus interacts with the host UPR can define the characteristic of a particular virus infection. Understanding how a particular virus interacts with the host UPR may pave the way to the design of a new class of anti viral that targets this particular pathway to skew the response towards anti virus. This knowledge can also be translated into the clinics to help re design oncolytic virotherapy and gene therapy. In this research topic we aimed to compile a collection of focused review articles original research articles commentary opinion hypothesis and methods to highlight the current advances in this burgeoning area of research in an attempt to provide an in depth understanding of how viruses interact with the host UPR which may be beneficial to the future combat of viral and human diseases.
