**Proceedings of the International Conference on Education Research** Reza Hosseini, *X-kit FET Grade 12 LIFE SCIENCE*, 2008 **Towards the sustainable well-being of communities** Attie van Niekerk, 2024-12-03 This book offers a transdisciplinary exploration of the southern African context examining the dynamic interactions between traditional African beliefs Christianity and the modern global empire all in close relation to the African landscape and ecology Drawing on original research the book delves into the ways these powerful forces have shaped contemporary households and communities emphasizing the importance of community agency and sustainable indigenous solutions for everyday challenges It highlights the intersection of cultural religious and ecological systems offering a holistic approach to building resilient and sustainable communities While centered on Southern Africa the book s insights are valuable to global researchers and those invested in creating a dignified livable and sustainable future for Africa *South African Schooling: The Enigma of Inequality* Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa s leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at

least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI      **Schooling for Sustainable Development in Africa** Heila Lotz-Sisitka, Overson Shumba, Justin Lupele, Di Wilmot, 2016-11-11 This book considers the scope and dynamics of Education for Sustainable Development ESD and learning in schools in Africa It explores the conditions and processes that support such learning and examines how ESD in schooling can improve the quality and relevance of education The quality of education has been defined internationally as a key concern for educational institutions around the world including schools in Africa The models of quality are often limited to performance based approaches and or inclusive approaches The contributions in this book show that there is more to a discussion on educational quality in Africa than performance success and or inclusion The chapters explain how ESD brings a new relevance to education in Africa and at the same time sounds the beginning of a new concept of quality education The volume presents a collection of experiences in creating and supporting quality learning processes through a variety of ESD practices      *Transformative Practices in Secondary School Science Classrooms* Loyiso Currell Jita, 1999      Annual Report South Africa.
