Life Science Paper Memorandum 2november 2014

William B. Bonvillian, Charles Weiss

Life Science Paper Memorandum 2 November 2014:

The Source of All Things Reinhard Friedl, 2015-08-22 In the tradition of Henry Marsh's *No Harm* Reinhard Friedl's *The Source of All Things* is a heart surgeon's personal investigation of the human heart moving from his riveting clinical experiences to a more poetic understanding of its workings. The heart is our most important organ. Yet despite that it has not changed since the appearance of *Homo sapiens* 300,000 years ago it is also our most mysterious. In most human cultures it is seen as the source of love, sympathy, joy, courage, strength, and wisdom. What if the heart could answer questions neurosciences can't begin to? Having witnessed the extraordinary complexity and unpredictability of human hearts in the operating theatre, each one individual like a fingerprint, heart surgeon Reinhard Friedl looked again at this primitive pump to reconcile it with his experiences from thousands of heart operations. In this book he presents findings from various scientific disciplines such as secret connections of the heart and brain and their influence on emotions and consciousness. He reveals the miracle that is the heart that we speak about so often yet is strangely foreign to many human beings. Full of compelling patient stories, *The Source of All Things* ends with a plea that we recognize the heart's wisdom and adopt a more heart-centered way of living leading to greater health and more joy.

Principles of Clinical Medicine for Space Flight Michael R. Barratt, Ellen S. Baker, Sam L. Pool, 2020-01-02 In its first edition *Principles of Clinical Medicine for Space Flight* established itself as the authoritative reference on the contemporary knowledge base of space medicine and standards of care for space flyers. It received excellent notices and is used in the curricula of civilian and military training programs and used as a source of questions for the Aerospace Medicine Certifying Examination under the American Board of Preventive Medicine. In the intervening few years the continuous manning of the International Space Station has both strengthened existing knowledge and uncovered new and significant phenomena related to the human in space. The Second Edition incorporates this information. Gaps in the first edition will be addressed with the addition of new and revised chapters. This edition is extensively peer reviewed and represents the most up-to-date knowledge.

Technological Innovation in Legacy Sectors William B. Bonvillian, Charles Weiss, 2015-08-18 The American economy misses opportunities for innovation, growth, and job creation because of a neglected problem: the resistance to innovation from legacy sectors like energy, manufacturing, and health care, which constitute most of our economy. The book offers systematic strategies to overcome the structural obstacles to innovation in critically important legacy sectors.
