Blinne, 2021-01-11 In *Grading Justice* Teacher Activist Approaches to Assessment new and seasoned teachers are invited to engage with socially just approaches of assessment including practices aimed at resisting and undoing grading and assessment altogether to create more democratic grading practices and policies foregrounding the transformative potential of communication within their courses The contributions in this collection encourage readers to consider not only how educators might assess social justice work in and beyond the classroom but also to imagine what a social justice approach to grading and assessment would mean for intervening into unjust modes of teaching and learning Educators wishing to explore critical modes of grading and assessment grounded in social justice will find this book a timely and relevant pedagogical guide for their teaching and scholarship The Post-Pandemic Liberal Arts College Steve Volk, Beth Benedix, 2020-12-08 A succinct and impassioned call to reimagine and revive the small liberal arts college by two veteran educators Private liberal arts colleges have struggled for decades now as the COVID 19 pandemic widens cracks latent in many American institutions they are facing a possibly mortal crisis In *The Post Pandemic Liberal Arts College A Manifesto for Reinvention* Steven Volk and Beth Benedix call for small colleges to seize this moment and reinvent themselves With the rise of rankings that set peer institutions against each other tuition that outpaces income creeping pre professionalism and a race to build student customers the splashiest new amenities many private liberal arts colleges have strayed from their founders missions If they could shed the mantle of exclusivity reduce costs facilitate true social mobility and collaborate with each other the authors argue they might both survive and again become just equitable accessible institutions able to offer the transformative and visionary education that is their hallmark Educators students parents and anyone invested in the future of higher education should read this book Women's Lives around the World Susan M. English Learners in STEM Subjects National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Board on Science Education, Committee on Supporting English Learners in STEM Subjects, 2019-01-28. The imperative that all students including English learners (ELs) achieve high academic standards and have opportunities to participate in science, technology, engineering, and mathematics (STEM) learning has become even more urgent and complex given shifts in science and mathematics standards. As a group, these students are underrepresented in STEM fields in college and in the workforce at a time when the demand for workers and professionals in STEM fields is unmet and increasing. However, English learners bring a wealth of resources to STEM learning, including knowledge and interest in STEM-related content that is born out of their experiences in their homes and communities, home languages, variation in discourse practices, and in some cases, experiences with schooling in other countries. *English Learners in STEM Subjects: Transforming Classrooms, Schools, and Lives* examines the research on ELs' learning, teaching, and assessment in STEM subjects and provides guidance on how to improve learning outcomes in STEM for these students. This report considers the complex social and academic use of language delineated in the new mathematics and science standards, the diversity of the population of ELs, and the integration of English as a second language instruction with core instructional programs in STEM. *The Times Index*, 2011.
