Chemical Control Michael Crowley, 2016-01-26 This thoroughly researched study highlights the international community's failure to regulate contemporary state research development marketing and or deployment of riot control agents and incapacitating chemical agent weapons

The Closing of the Liberal Mind Kim R. Holmes, 2016-04-12 A former U S Assistant Secretary of State and currently a Distinguished Fellow at the Heritage Foundation Kim R Holmes surveys the state of liberalism in America today and finds that it is becoming its opposite illiberalism abandoning the precepts of open mindedness and respect for individual rights liberties and the rule of law upon which the country was founded and becoming instead an intolerant rigidly dogmatic ideology that abhors dissent and stifles free speech Tracing the new illiberalism historically to the radical Enlightenment a movement that rejected the classic liberal ideas of the moderate Enlightenment that were prominent in the American Founding Holmes argues that today's liberalism has forsaken its American roots incorporating instead the authoritarian anti clerical and anti capitalist prejudices of the radical and largely European Left The result is a closing of the American liberal mind Where once freedom of speech and expression were sacrosanct today liberalism employs speech codes trigger warnings boycotts and shaming rituals to stifle freedom of thought expression and action It is no longer appropriate to call it liberalism at all but illiberalism a set of ideas in politics government and popular culture that increasingly reflects authoritarian and even anti democratic values and which is devising new strategies of exclusiveness to eliminate certain ideas and people from the political process Although illiberalism has always been a temptation for American liberals lurking in the radical fringes of the Left it is today the dominant ideology of progressive liberal circles This makes it a new danger not only to the once venerable tradition of liberalism but to the American nation itself which needs a viable liberal tradition that pursues social and economic equality while respecting individual liberties

The Impact of Systems Medicine on Human Health and Disease Adil Mardinoglu, Jens Nielsen, 2017-03-24 Complex disorders including obesity diabetes fatty liver disease cardiovascular disease and cancer are results from a combination of genetic environmental and lifestyle factors The prevalence of such disorders has increased dramatically in the last two decades and there is an urgent need for the development of new prognostic tools for the treatment of such diseases However this requires a deep understanding of the underlying molecular mechanisms involved in the occurrence of the diseases With the advances in high throughput technologies biological components of cells can be measured with a very high resolution and these data can be used for investigating whole systems properties using a network based approach Systems medicine provides an integrative platform for studying the interactions between the biological components of the cell using a holistic approach and generating mechanistic explanations for the emergent systems properties This interdisciplinary field of study allows for understanding biological processes of cells in health and disease states gaining new insights into what drives the appearance of the disease and finally identifying proteins and metabolites

implicated in human disease Systems medicine utilizes mathematical approaches to generate models which can be employed for designing new sets of experiments and for mapping the response of the system to perturbations quantitatively These models as well as the developed tools can accelerate the emergence of personalized medicine which can transform the practice of medicine and offer better targets for drug development with minimum side effects [Preventing Weaponization of CNS-acting Chemicals](#) Michael Crowley, Malcolm Dando, 2025-11-24 Recent advances in neuroscience the study of the mechanisms within the brain that underlie our behaviours and what happens when these go wrong have been profound However benignly intended neurological research that seeks to understand dysfunction in the central nervous system CNS could be misused for example in the development of novel CNS acting chemical agent weapons for use in armed conflict and also in repression of civilian populations This book follows a 3 step Holistic Arms Control approach examining the biochemical agents and relevant physiological systems they affect as well as associated dual use technologies that need to be regulated analysing a range of potentially applicable international law international arms control disarmament and other instruments and attendant control regimes constraining misuse and finally providing a strategy to strengthen existing regulatory mechanisms as well as suggest new measures to prevent the misuse of the neurosciences and associated dual use technologies without limiting the widespread health and other societal benefits that flow from their benign application Suitable for biochemists and researchers in the areas of neuroscience neurochemistry and neuropharmacology this book will also be of interest for those working in arms control disarmament and related legal fields as well as forensic medicine and toxicology **Innovations in Modeling and Simulation to Advance Translational Science** Melissa Knothe Tate, Leonardo Angelone, Christopher Basciano, Markus Reiterer, 2020-12-15 This eBook is a collection of articles from a Frontiers Research Topic Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series they are collections of at least ten articles all centered on a particular subject With their unique mix of varied contributions from Original Research to Review Articles Frontiers Research Topics unify the most influential researchers the latest key findings and historical advances in a hot research area Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office frontiersin.org/about/contact **Water management for sustainable agriculture** Prof. T.
