Life Science Scope 2014 Paper1:

Digital Tools and Solutions for Inquiry-Based STEM Learning Levin, Ilya, Tsybulsky, Dina, 2017-03-31 In the digital age the integration of technology has become a ubiquitous aspect of modern society. These advancements have significantly enhanced the field of education, allowing students to receive a better learning experience. **Digital Tools and Solutions for Inquiry Based STEM Learning** is a comprehensive source of scholarly material on the transformation of science education classrooms through the application of technology. Including numerous perspectives on topics such as instructional design, social media, and scientific argumentation, this book is ideally designed for educators, graduate students, professionals, academics, and practitioners interested in the latest developments in the field of STEM education. **International GAAP 2017** Ernst & Young LLP, 2017-02-16 IFRSs the standards set by the International Accounting Standards Board (IASB) are complex and sometimes obscure. Understanding their implications and applying them appropriately requires something special, and that is why **International GAAP 2017** is the essential tool for anyone applying, auditing, interpreting, regulating, studying, and teaching international financial reporting. It provides expert interpretation and practical guidance for busy professionals and includes in every chapter detailed analysis of how complex financial reporting problems can be resolved appropriately and effectively. The International Financial Reporting Group of Ernst & Young provides an explanation of relevant principles, a clear exposition of the requirements of IFRS, a discussion of the implications in practice and possible alternative solutions, available worked examples, extracts from real company accounts, a full listing of the required disclosures, an important part to play in the process of promoting consistent, comparable, and high quality financial reporting under IFRS, a book that not only provides an analysis of the requirements of the standards and the principles that they expound but also presents a unique explanation of how the standards should be interpreted and applied in practice. The Chairman of Trustees of the IASB Foundation. A standard reference work. **Financial Times**. The definitive guide to financial reporting. **The Times**. **Indicators for Monitoring Undergraduate STEM Education** National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Science Education, Committee on Developing Indicators for Undergraduate STEM Education, 2018-04-08 Science, technology, engineering, and mathematics (STEM) professionals generate a stream of scientific discoveries and technological innovations that fuel job creation and national economic growth. Ensuring a robust supply of these professionals is critical for sustaining growth and creating jobs growth at a time of intense global competition. Undergraduate STEM education prepares the STEM professionals of today and those of tomorrow while also helping all students develop knowledge and skills they can draw on in a variety of occupations and as individual citizens. However, many capable students intending to major in STEM later switch to another field or drop out of higher education altogether, partly because of documented weaknesses in STEM teaching, learning, and student supports. Improving undergraduate STEM education to address these weaknesses is a national imperative. Many initiatives are now underway to

improve the quality of undergraduate STEM teaching and learning Some focus on the national level others involve multi institution collaborations and others take place on individual campuses At present however policymakers and the public do not know whether these various initiatives are accomplishing their goals and leading to nationwide improvement in undergraduate STEM education Indicators for Monitoring Undergraduate STEM Education outlines a framework and a set of indicators that document the status and quality of undergraduate STEM education at the national level over multiple years It also indicates areas where additional research is needed in order to develop appropriate measures This publication will be valuable to government agencies that make investments in higher education institutions of higher education private funders of higher education programs and industry stakeholders It will also be of interest to researchers who study higher education
