Managing Work Life Balance In Construction:

Managing Work-Life Balance in Construction Helen Lingard, Valerie Francis, 2009-04-09 Work in the construction industry is particularly tough. It demands excessively long hours and frequent weekend work. Other characteristics are particularly marked such as relocation, job insecurity and distinctive behavioural patterns which negatively affect employees' personal lives further. Work-life balance has emerged as one of the most pressing management issues in the 21st century. For construction managers dealing with traditional models of work and rigid work schedules, the issue may be especially difficult to manage and yet the work-life balance is now recognised as an issue of strategic importance to the construction industry. It is critical to the construction industry's continued ability to attract and retain a talented workforce and it is also inextricably linked to organizational effectiveness and employees' well-being. This book presents the argument for the management of work-life balance in the construction industry. It maps the changes to the workforce demographic profile and the changing expectations relating to work and personal life that occurred during the second half of the 20th century. Legal imperatives for managing work-life balance are set out. It also presents work-life balance theory and discusses the practical implications of research along with extensive empirical data collected from the industry. Lastly, practical advice is provided about what construction organizations can and should do to manage work-life balance. This provides a unique guide to a key issue.

Work-Life Balance in Construction Low Sui Pheng, Benjamin K. Q. Chua, 2018-08-24 The book presents the latest studies on the work-life balance of millennials, also known as Generation Y, building professionals in Singapore and South Korea. Its main goal is to compare and contrast the workplace attitudes of millennials and to provide guidelines that help supervisors in the construction industry manage their employees' expectations regarding work-life balance. Accordingly, it explains and links various principles regarding work-life conflicts, work-life enrichments and the work-life interface. Furthermore, the book introduces readers to coping strategies, a dimension that has not yet been explored substantially and has the potential to contribute significantly to the study and understanding of work-life balance. The book makes recommendations for the top management on assigning a capable leader to drive the changes in the organization and on empowering the leader to implement effective strategies for promoting work-life balance, especially for the millennials who are now playing an increasing central role in the global construction sector.

Women in Construction Patience Tunji-Olayeni, Clinton Aigbavboa, Abimbola Windapo, Ayodeji Oke, 2024-11-25 This edited book aims to provide a collection of scientific evidence on gender issues in the construction industry that contributes to discussions on equality, gender diversity and inclusion in the built environment. It also provides baseline data for policy design and future research on women in the built environment. Presenting research findings from Africa, India and Australia, the aims of this book are broad and it begins with an assessment of the gender-based challenges in the construction sector from the perspective of two generations of women. It goes on to discuss the issues affecting the recruitment and career progression of women in construction and also to

proffer solutions to the low turnout of women in the construction industry Further chapters cover issues on the retention and persistence of women in the sector despite the perceived gender rooted challenges Research into female leadership in the construction industry is also presented in this book with specific focus on the management of construction sites quantity surveying practice and digital leadership This book ends with a discussion on the impact of gender consideration on the sustainability of construction businesses accessibility of housing finance and infrastructure provisions such as markets The research in this book is key reading for scholars of construction management gender studies and DEI and the workplace
