Drug Repositioning Joel Dudley, Laura Berliocchi, 2017-07-14 Nervous system diseases represent a major health concern worldwide. Although important financial and professional investment, their etiology and pathophysiology still remain mostly elusive. Moreover, the clinical need of disease-modifying therapies is still unmet. In the last decades, traditional R & D has failed in identifying new effective therapies in many medical areas, and drug repositioning has recently emerged as a promising alternative strategy to de novo drug discovery to improve and accelerate therapeutic development. For the first time, *Drug Repositioning: Approaches and Applications for Neurotherapeutics* reviews history and advances in drug repositioning with a special focus on therapeutics for nervous system diseases. International experts from Academia, Industry, and Non-profit organisations will provide different views on drug repositioning advantages, challenges, and specific applications, which will be covered for nervous system diseases including Alzheimer's, Parkinson's, Huntington's diseases, Amyotrophic Lateral Sclerosis, Spinal Muscular Atrophy, ischemic stroke, and psychiatric disorders. This book provides a balanced overview and synthesis of drug repositioning concept, methods, and applications for neurotherapeutics. It represents a valuable resource for students, scientists, and clinicians working in academic settings, industry, and government agencies within the fields of neuroscience, pharmacology, neurology, pharmaceutical sciences, drug discovery, and development. **The Plant Disease Reporter**, 1979 **The Plant Disease Bulletin**, 1979 **Environmental Factors in Neurodegenerative Diseases**, 2017-09-19 *Environmental Factors in Neurodegenerative Diseases: Volume One* addresses contemporary advances in neurotoxicology with thematic volumes providing authoritative review articles on key issues in the field. Updates in this new volume include chapters on Air pollution and neurodegenerative diseases, Mercury and Parkinson's disease, Pesticides and PD, current evidence, Aluminum and neurodegeneration, Microglia and neurodegeneration, Dietary factors, Mitochondria in neurodegeneration, and Manganese and neurodegeneration. Edited by leading experts, volumes are designed as in-depth overviews of the latest topic developments that analyze the effect of varied chemical agents on the nervous system. It is an essential resource for researchers and graduate students alike. Includes in one single publication a selection of comprehensive reviews devoted to neurotoxicology. Edited by high-profile leading academics in the field, ensuring a quality publication for subscribers. Aims to widen the scope for participation by international contributors, researchers, and editorial board members outside North America. Serves a broad audience of university faculty, researchers, and students as well as the industry, drug development companies, and the government. **Plant Disease Reporter**, 1979 [Environmental Contaminants and Neurological Disorders](#) Muhammad Sajid, Hamid Akash, Kanwal Rehman, 2021-05-17 This volume discusses how environmental pollutants are involved in the pathogenesis of neurological disorders and covers specific mechanisms and risk factors as well as the necessary strategies to reduce the adverse impacts of environmental pollutants on the human nervous system. With a collection of contributions from experts in environmental pollution, neurology, and pharmaceutical

chemistry the book provides both an introduction to the pathogenesis of neurodegeneration including the types and different classes of neurological disorders and studies demonstrating the clear link between environmental contaminants e g pesticides smoking mycotoxins persistent organic pollutants POP s polychlorinated biphenyls phthalates nanomaterials and the development of neurological disorders in vulnerable populations The book fills in a gap in research on the topic by also covering state of the art treatment strategies and mitigation measures for each type of pollutant The book will be of interest to environmental scientists pharmacologists toxicologists biochemists biotechnologists and food and drug regulatory organizations
