3 marks: Wundt's role discussed in detail with clarity and coherence, and with appropriate use of terminology.

2 marks: Wundt's role discussed with some clarity and / or coherence.

1 mark: there is limited understanding of Wundt's role in the development of psychology.

Candidates may focus on one point in detail or more than one point in less detail.

Possible discussion points:

- first to open a laboratory designated to the scientific study of psychological enquiry under controlled conditions facilitating accurate measurements and replication
- focus was on trying to understand psychological processes of perception etc and structuralism rather than philosophical or biological processes
- he later recognised that higher mental processes were difficult to study using his procedures and this encouraged others to look for more appropriate methods and techniques, paving the way for approaches such as scanning
- introspection still used today in areas such as therapy and studying emotional states demonstrating its value as one way mental processes can be investigated
- issues of determinism and predictability could be presented as a strength or limitation.

Credit other relevant discussion.

- Use a 'token economy system' with respect to litter-picking. Use of a positive reinforcement strategy – for 'x' amount of litter, a reward of 'y' and exchange of 'y' for something pleasant the children will value.
- direct primary reinforcement (e.g. deliberately rewarding children who pick up litter)
- use of vicarious reinforcement (e.g. watching a film or seeing teacher deliberately rewarding children who pick up litter).
