

About the *Modern Biology* Study Guide

The Section Review worksheets can be used in a number of ways to guide you through your textbook: as a pre-reading guide to each section, as a review of the chapter's main concepts after you read each section, or even as test preparation for your biology exams. No matter how your teacher chooses to use these worksheets, the *Modern Biology* Study Guide will help you succeed in your study of biology.

In each Section Review worksheet, you will encounter four types of exercises:

Vocabulary Review exercises help you to review important terms in each section.

Multiple Choice questions test your understanding of important concepts and terms introduced in each section.

Short Answer (with Critical Thinking) questions help you to synthesize and write your own conclusions using information in the section.

Structures and Functions questions provide opportunities to label major structures and processes or to interpret data or figures in order to examine the section material in a larger context.
