Mixtures and Solutions Study

1. What is a mixture?

Answer: A mixture is a combination of two or more substances that are physically combined but not chemically bonded. The components of a mixture retain their individual properties and can be separated by physical means (e.g., filtration, evaporation).

2. What is a solution?

Answer: A solution is a type of mixture where one substance (the solute) is completely dissolved in another substance (the solvent). Solutions are homogeneous, meaning the composition is uniform throughout.

3. Types of Mixtures

Homogeneous Mixture: The composition is uniform throughout. (Example: Saltwater)

Heterogeneous Mixture: The composition is not uniform; different parts of the mixture are visible. (Example: Salad or a trail mix)

4. Examples of Mixtures

Homogeneous Mixture: Sugar dissolved in water, air (a mixture of gases).

Heterogeneous Mixture: Sand and iron filings, salad, chocolate chip cookies.

5. What are solutes and solvents?

Solute: The substance that is dissolved in a solution.

Solvent: The substance that dissolves the solute.

6. What is a saturated solution?

Answer: A saturated solution contains the maximum amount of solute that can dissolve at a given temperature. Any additional solute will not dissolve and will settle at the bottom.

7. What is solubility?

Answer: Solubility is the ability of a solute to dissolve in a solvent at a specific temperature and pressure. It varies for different substances.

8. What is a suspension?

Answer: A suspension is a heterogeneous mixture where the particles are large enough to settle out over time (e.g., muddy water).

9. What is a colloid?

Answer: A colloid is a type of mixture where the particles are dispersed throughout but are not large enough to settle out (e.g., milk, fog). Colloids scatter light, known as the Tyndall effect.

10. What is concentration?

Answer: Concentration refers to the amount of solute dissolved in a certain amount of solvent or solution. A solution can be dilute (low concentration of solute) or concentrated (high concentration of solute).
