Chapter authors explore diverse aspects of a languaging framework the perspective of language as a series of ongoing and evolving interactional social actions and processes over time. Based on their research the authors suggest directions for addressing substantive engagement as well as the marginalization superficiality and violence symbolic and otherwise that characterize the educational experience of so many students. Wilcox, 2018-11-07 This volume culls scholarship on both what high literacy is and how it is developed. It embraces the call put forth by Langer and Applebee 2016 that high literacy must continue to be our aim and to see more research analyzing and identifying how teachers might promote literacy practices that promote deep thinking around important content. The editors offer a conceptual framework for high literacy that explicates how each component i.e. reading writing dialogic engagement and epistemic cognition in literary reasoning relates to the others and from what scholarly literature these concepts have been derived. Individual chapter authors provide in depth examinations of the existing research base on particular related topics focusing on the two important cross cutting aims of the volume 1 explicating the roles reading writing dialogic engagement and epistemic cognition hold in high literacy development and 2 providing examples of practices recommended to develop high literacy. *Composition and Grammar* ENC1101 Editorial Board, 2022-06-15 We live in a world of words.
