*Time-of-Flight and Depth Imaging. Sensors, Algorithms and Applications* Marcin Grzegorzec, Christian Theobalt, Reinhard Koch, Andreas Kolb, 2013-11-09 Cameras for 3D depth imaging using either time of flight ToF or structured light sensors have received a lot of attention recently and have been improved considerably over the last few years The present techniques make full range 3D data available at video frame rates and thus pave the way for a much broader application of 3D vision systems A series of workshops have closely followed the developments within ToF imaging over the years Today depth imaging workshops can be found at every major computer vision conference The papers presented in this volume stem from a seminar on Time of Flight Imaging held at Schloss Dagstuhl in October 2012 They cover all aspects of ToF depth imaging from sensors and basic foundations to algorithms for low level processing to important applications that exploit depth imaging In addition this book contains the proceedings of a workshop on Imaging New Modalities which was held at the German Conference on Pattern Recognition in Saarbrücken Germany in September 2013 A state of the art report on the Kinect sensor and its applications is followed by two reports on local and global ToF motion compensation and a novel depth capture system using a plenoptic multi lens multi focus camera sensor

**Advanced Automation for Tree Fruit Orchards and Vineyards** Stavros G. Vougioukas, Qin Zhang, 2023-05-23 Modern tree fruit orchards and vineyards constitute complex production systems that are exposed to highly dynamic and stochastic natural financial and societal forces and face demands for increased production using fewer resources with reduced environmental impact Successful operation of orchards and vineyards under these conditions is practically impossible without careful and extensive use of state of the art automation technologies and careful planning of future operations e.g. training systems when replanting that can be enabled by knowledge of emerging technologies and future trends Also improvement of existing automation technologies and development of novel future systems cannot be accomplished without a working understanding of the tree and vine biological production systems their management needs and the capabilities and limitations of existing automation systems The book aims to provide the necessary knowledge to achieve the above goals in a way that can engage readers without engineering or horticultural backgrounds
