Designed as the perfect compliment to the highly popular KICKER® IMPULSE line of moderately-priced speakers, IMPULSE Amplifiers allow you to build a high performance car audio system on a budget.

The myriad of features on the IMPULSE Amplifiers make it possible for you to use any source unit to control a single amp or bi-amp system with or without rear fill.

### **Features and Controls**

Your IMPULSE four-channel amplifier is 2 Ohm stable in stereo mode and will operate as low as 4 Ohms in bridged mono. For connection to the source you have the option of high level input for use with radios that don't have RCA outputs.

An electronic crossover is built in for convenience and allows you to select high pass for satellite speakers, low pass for subwoofers, or bypass for full range operation. In full range configuration the Impulse amps will operate stereo and mono at the same time.

Separate KICKEQ™ bass and treble controls give you the ability to boost low and high frequencies to tailor the music to your taste.

Auto-resetting short circuit and overthermal protection circuits are incorporated to protect the amplifier from failure due to extreme conditions.

State of the art circuitry including a MOSFET power supply and glass epoxy circuit boards are used to ensure many years of trouble free operation.
