Kinder Glad Strategies:

Integrating GLAD Strategies Into Kindergarten Multi-disciplinary Units, 2013 **Kindergarten Transition and Readiness** Andrew J. Mashburn, Jennifer LoCasale-Crouch, Katherine C. Pears, 2018-06-09 This book presents a comprehensive overview of children's transitions to kindergarten as well as proven strategies that promote their readiness. It presents theories and research to help understand children's development during the early childhood years. It describes evidence-based interventions that support children in developmental areas essential to school success including cognitive, social, emotional, and self-regulatory skills. Chapters review prekindergarten readiness programs designed to promote continuity of learning in anticipation of the higher grades and discuss transitional concerns of special populations such as non-native speakers, children with visual and other disabilities, and children with common temperamental issues. The volume concludes with examples of larger scale systemic approaches to supporting children's development during the transition to kindergarten, describing a coherent system of early childhood education that promotes long-term development. Featured topics include: Consistency in children's classroom experiences and implications for early childhood development; Changes in school readiness in U.S. kindergartners; Effective transitions to kindergarten for low-income children; The transition into kindergarten for English language learners; The role of close teacher-child relationships during the transition into kindergarten; Children's temperament and its effect on their kindergarten transitions. *Kindergarten Transition and Readiness* is a must-have resource for researchers, clinicians, and related professionals and graduate students in child and school psychology, educational psychology, social work, special education, and early childhood education. *The National Drug Control Strategy* United States. Congress. House. Committee on Government Operations. Legislation and National Security Subcommittee, 1993 **Fifteen Positive Behavior Strategies to Increase Academic Success** Beverley Holden Johns, 2014-10-28 Powerful behavioral interventions to help your students succeed. Behavioral problems can disrupt learning for the whole classroom if not managed properly, which is often a matter of frustrating trial and error. This must-have guide delivers a set of fifteen practical intervention techniques that can be applied to virtually any situation in both pull-out and inclusive classrooms. Backed by research and case studies, each chapter is brief and to the point, with a focus on one behavioral intervention technique. Insights include: Incorporating student interests in classroom activities; Understanding the reason the student is misbehaving to plan an appropriate intervention; Understanding how stimulation impacts performance.

Kindergarten Panic Bailey A. Brown, 2025-08-19 How school choice reproduces inequality by creating gendered and socioeconomic decision-making labor for parents. School choice policies have proliferated in recent years with parents forced to navigate complex admission processes. In New York City, families have more options than ever before, but the search for the right school has proven to be time-consuming, painstaking, and anxiety-provoking work. In *Kindergarten Panic*, Bailey Brown examines the experiences of parents as they search for elementary schools, finding that socioeconomic inequalities and

persistent disparities in resources information access and decision making power contribute to broad variation in how families develop and manage their school choice labor strategies The labor that parents invest in searching for schools is unevenly distributed and shaped by gender socioeconomic background and neighborhood contexts Drawing on interviews with more than a hundred parents of elementary school students in New York City Brown shows how inequality manifests itself as parents and students deal with the uncertainties of the school choice process By conceptualizing school decision making as labor she makes visible the often unseen work that goes into making educational decisions for children Brown argues that recognizing school choice as labor both deepens our theoretical understanding of the challenges families confront and identifies vast disparities in parents labor across socioeconomic and gender divisions If parents continue to be charged with searching for schools we must take seriously how school choice policies reproduce the kind of inequality they are intended to reduce and we must invest in providing equitable access to high quality public schooling for all families
