

For Beginners

Leaves appear rather in mass, sometimes overlapping, etc., and their increasing with autumn/winter is an obvious feature, suggests changes over seasons. In some cases of some species, you would not notice differences (except/absent) in the display in its ornamental character. These points will come back later in the discussion on displays with some individual examples, and these details are brought fully before you next time at discussion in both the displays and the plants processes. Specimens will follow some basic details in autumn/winter display.

Thamnen, J. (1990). *Thamnen's Grammar*. (Ed. by J. H. Greenberg). (Linguistic Inquiry Monograph 10). Cambridge, MA: MIT Press.

Students spend about 45 min, constructing self-growing cells, and then construct cells around a central nucleus as shown below. Students suggest different ways to design the cell wall and central nucleus, such as central vacuole/nucleus, cell-surface membrane, cell wall, etc. as they go on to construct the membrane. They discuss and vote about which design is best and the cell membrane cells are complete. Students and their designs are brought back to the front to vote on the best design or have public discussion and finally present arguments and defend their design. The discussion is then held.

[illegible]

Between groups (differences of group membership affecting the risk factor) commonly with statistical significance as tested. Within groups (differences between individuals, not affecting the risk factor).
