Matisse S Sculpture The Pinup And The Primitive:

Matisse's Sculpture Ellen McBreen, 2014 In 1906 soon after Matisse acquired his first African sculpture he began the first of his nudes based on erotic and ethnographic photographs This reading of Matisse's early sculpture examines the artist's appropriations from two seemingly disparate visions of the body commercial nude photography and African sculpture Why would Matisse synthesize mechanically made traces of actual flesh with the hand carved abstractions of Pende Senufo Baga and Baule figural sculptures In the twentieth century halftone technology in France changed economics of photographic reproduction The inexpensive illustrated revues where Matisse found substitutes for living models were full of plates making the female body available for mass consumption as never before One of the main appeals of African sculpture to Matisse and others was that it appeared as a productive antithesis to this it represented an alternative experience and understanding of human sexuality In this Matisse's primitivism was as much a system of beliefs projected onto African sculptures and actual African bodies as a series of visual and conceptual borrowings from them To support this idea the book uses primary materials from turn of the century ethnography and comparative anthropology popular erotica and the visual culture of French colonialism It draws connections between artistic debts and the ideological and historical forces informing them and plots new study in a now familiar story of early twentieth century modernist primitivism This book challenges an established convention about Matisse a painter who sculpted merely as a rest proposing how the sculpture's play with period perceptions of race and gender is key to understanding the artist's fascinations with cultural and sexual origins **Henri Matisse**

Cohen, 2020-07-21 Reading African art's impact on modernism as an international phenomenon The Black Art Renaissance tracks a series of twentieth century engagements with canonical African sculpture by European African American and sub-Saharan African artists and theorists Notwithstanding its occurrence during the benighted colonial period the Paris avant-garde discovery of African sculpture known then as art nègre or black art eventually came to affect nascent Afro-modernisms whose artists and critics commandeered visual and rhetorical uses of the same sculptural canon and the same term Within this trajectory black art evolved as a framework for asserting control over appropriative practices introduced by Europeans and it helped forge alliances by redefining concepts of humanism race and civilization From the Fauves and Picasso to the

Harlem Renaissance and from the work of South African artist Ernest Mancoba to the imagery of Negritude and the role of Dakar African sculpture its influence proved transcontinental in scope and significance Through this extensively researched study Joshua I Cohen argues that art history's alleged centers and margins must be conceived as interconnected and mutually informing The Black Art Renaissance reveals just how much modern art has owed to African art on a global scale

Global Anti-Vice Activism, 1890-1950 Jessica R. Pliley, Robert Kramm, Harald Fischer-Tiné, 2016-07-04 Vice was one of the primary shared interests of the global community at the turn of the twentieth century Anti vice activists worked to combat noxious substances such as alcohol drugs and cigarettes and immoral sexual activities such as prostitution Nearly all of these activists approached the issue of vice by expressing worries about the body its physical health and functionality By situating anti vice politics in their broader historical contexts *Global Anti Vice Activism 1890 1950* sheds fresh light on the initiatives of various actors organizations and institutions which have previously been treated primarily within national and regional boundaries Looking at anti vice policy from both social and cultural historical perspectives it illuminates the centrality of regulating vice in imperial and national modernization projects The contributors argue that vice and vice regulation constitute an ideal topic for global history because they bridge the gap between discourse and practice and state and civil society
