prepare for them Poverty, Prosperity, and Planet Report 2024 World Bank, 2024-10-15 The Poverty Prosperity and Planet Report 2024 is the latest edition of the series formerly knownas Poverty and Shared Prosperity The report emphasizes that reducing poverty and increasing shared prosperity must be achieved in ways that do not come at unacceptably high costs to the environment The current polycrisis where the multiple crises of slow economic growth increased fragility climate risks and heightened uncertainty have come together at the sametime makes national development strategies and international cooperation difficult Offering the first post Coronavirus COVID 19 pandemic assessment of global progress on this interlinked agenda the report finds that global poverty reduction has resumed but at a paceslower than before the COVID 19 crisis Nearly 700 million people worldwide live in extreme poverty with less than US 2 15 per person per day Progress has essentially plateaued amidlower economic growth and the impacts of COVID 19 and other crises Today extreme povertyis concentrated mostly in Sub Saharan Africa and fragile settings At a higher standard moretypical of upper middle income countries US 6 85 per person per day almost one half of theworld is living in poverty. The report also provides evidence that the number of countries that have high levels of incomeinequality has declined considerably during the past two decades but the pace of improvements in shared prosperity has slowed and that inequality remains high in Latin America and the Caribbean and Sub Saharan Africa Worldwide people s incomes today would need to increase five fold on average to reach a minimum prosperity threshold of US 25 per person per day Where there has been progress in poverty reduction and shared prosperity there is evidence of an increasing ability of countries to manage natural hazards but climate risks are significantlyhigher in the poorest settings Nearly one in five people globally is at risk of experiencing welfarelosses due to an extreme weather event from which they will struggle to recover The interconnected issues of climate change and poverty call for a united and inclusive effortfrom the global community Development cooperation stakeholders from governments nongovernmental organizations and the private sector to communities and citizens actinglocally in every corner of the globe hold pivotal roles in promoting fair and sustainable transitions By emphasizing strategies that yield multiple benefits and diligently monitoring and addressing trade offs we can strive toward a future that is prosperous equitable and resilient

**Rethinking World Bank Influence** D. Brent Edwards Jr.,2023-04-13 Why is it so hard for international development organizations even ones as well resourced and influential as the World Bank to generate and sustain change in the way things are done in those countries where they work Despite what in many cases is decades of investment and effort why do partner governments continue to engage in those traditional patterns and styles of public service management that international development organizations have sought to supplant with methods that are supposedly more accountable efficient and effective This book provides an answer to these questions However rather than pathologizing partner governments as the source of the problem that is rather than maintaining the distinction between doctor international development organizations and patient partner governments wherein the patient is seen as unwilling to take their medicine

enacting good governance practices this book instead reframes the relationship The central argument is first that the programs and projects of international organizations are introduced into and are constrained by multiple layers of ritual governance that is performative acts and cultural logics that intersect with and reinforce the political economic and social structures in and through which they operate As is shown the contextual factors that guide governance practices are largely beyond the reach of the international development organizations the relevant logics have their roots in state ideology but also extend back to the colonial logics that continue to operate at the heart of the state apparatus. The second the central argument is that international aid organizations and the governments with which they work are engaged in a ritual aid dance where each actor plays a part but does not and cannot acknowledge the ways that it depends on the other for its own gain This relationship can be considered a dance because each participant responds to and needs the other and because both sides do so in ways that are carefully choreographed with the overall trajectory or contours of the dance being more or less known to the participants These arguments are based on research on the World Bank's efforts over the course of several decades to encourage through its financing projects and technical assistance the implementation of social sector reform in Indonesia related to decentralization community participation and school based management Who Matters at the World Bank? Kim Moloney, 2022 Who Matters at the World Bank explores who matters in a 32 year history 1980 2012 of policy change within the World Bank's public sector management and public sector governance agenda and is anchored within the public administration discipline and its understanding of bureaucracy bureaucratic politics and stakeholder influences In response to constructivist scholars concerns about politics and the organizational culture of international civil servants within international organizations Kim Moloney uses stakeholder theory and a bureaucratic politics approach to suggest the normality of politics policy debate and policy evolution The book also highlights how for 21 of those 32 years it was not external stakeholders but the international civil servants of the World Bank who most influenced led developed and institutionalized this sector's agenda In so doing the book explains how one sector of the Bank's work rose against the odds from being included in just under 3% of approved projects in 1980 to 73% of all projects approved between 1991 and 2012

Making Global Institutions Work Kate Brennan,2014-09-19 This book seeks to think differently about what we recognize as global institutions and how they could work better for the people who need them most By so doing the contributions show that there is a group of institutions that influence enough people s lives in significant enough ways through what they protect provide or enable that they should be considered together as global institutions The United Nations the World Bank the internet as well as private military and security companies leave a heavy footprint on the social political and economic landscape of the planet We are all aware in different ways of the existence of these global institutions but their importance in achieving change in the twenty first century is often underestimated In this book contributors seek to explain what associations exist between change in global institutions and the reduction of poverty and inequality as well as

the achievement of security and justice The work makes sense of processes of change and identifies the most significant obstacles that exist offering suggestions for future action that will be of interest to students and scholars of global institutions Guyana: from Slavery to the Present Ramesh Gampat, 2015-04-15 It is common knowledge that slavery and indenture were characterized by long hours of physical labor restriction of movement and other basic human freedoms and severe punishment for violations of draconian labor laws Less well known is the fact that nutrition was very deficient and a range of infectious diseases maimed debilitated and killed on a large scale In trying to narrow the knowledge gap with respect to Guyana Ramesh Gampat shows that extremely poor sanitary conditions awful hygiene and malnutrition hastened widespread infections and created a vicious cycle The British protected its own soldiers officials and colonists by establishing a medical enclave that lasted until Emancipation in 1838 Former slaves were then guarantined to neglected and decaying villages and Indians to plantations Concern with health conditions appeared only during periods of epidemics and even then it was essentially for the protection of Europeans Colonial medicine opened the way for stereotyping labeling racialization of disease neutralization of potential leaders in the struggle for justice and crystallization of the view that Europeans were superior to Blacks and Indians Shorter stature and shorter life expectancy are good indications that slaves and indentured immigrants fared considerably less well than Europeans Several infectious diseases sickened and fell Blacks and Indians including malaria and undefined fevers pneumonia and bronchitis diarrhea and enteritis tuberculosis pneumonia and hookworm The conquest of malaria in the early 1950s accelerated the epidemiological transition from communicable to chronic noncommunicable diseases and today NCDs account for some three quarters of all deaths in Guyana Malaria has reemerged fueled by a gold boom that consumes huge amounts of mercury The potentially adverse public health consequences of this relatively new dynamic the combined trio have been neglected World Bank News .1996 World Bank Administrative Tribunal Reports ... World Bank. Administrative Tribunal,1993 World Development Report ,1991 This report synthesizes and interprets the lessons of more than forty years of development experience Together with last year s report on poverty and next year s on the environment it seeks to provide a comprehensive overview of the development agenda The 1990s began with dramatic changes as many countries in Eastern Europe and elsewhere initiated ambitious reforms of their economic and political systems Against the backdrop of these transitions this report links the historical debates that counseled policymakers in their past decisions the lessons of experience and the evolving thought on how best to proceed One of the most valuable lessons relates to the interaction between the state and the market in fostering development It describes a market friendly approach in which governments allow markets to function well and in which governments concentrate their interventions on areas in which markets prove inadequate The report looks at four main aspects of the relationship between governments and markets a investing in people b the climate for enterprises to flourish c the integration of countries with the global economy and d a stable macroeconomic foundation for sustained progress The

report stresses that above all the future of developing countries is in their own hands Domestic policies and institutions hold the key to successful development
