Last Chance To See Douglas Adams En Mark Carwardine:

Last Chance to See Douglas Adams, Mark Carwardine, 2011-09-21 New York Times bestselling author Douglas Adams and zoologist Mark Carwardine take off around the world in search of exotic endangered creatures. Join them as they encounter the animal kingdom in its stunning beauty, astonishing variety, and imminent peril: the giant Komodo dragon of Indonesia, the helpless but loveable Kakapo of New Zealand, the blind river dolphins of China, the white rhinos of Zaire, the rare birds of Mauritius island in the Indian Ocean. Hilarious and poignant as only Douglas Adams can be, *Last Chance to See* is an entertaining and arresting odyssey through the Earth's magnificent wildlife galaxy. Praise for *Last Chance to See*: Lively, sharply satirical, brilliantly written, shows how human care can undo what human carelessness has wrought. The Atlantic: These authors don't hesitate to present the alarming facts. More than 1,000 species of animals and plants become extinct every year. Perhaps Adams and Carwardine, with their witty science, will help prevent such misadventures in the future. Boston Sunday Herald: Very funny and moving. The glimpses of rare fauna seem to have enlarged Adams's thinking, enlivened his world, and so might the animals do for us all if we were to help them live. The Washington Post Book World: Adams invites us to enter into a conspiracy of laughter and caring. Los Angeles Times: Amusing, thought-provoking. Its details on the heroic efforts being made to save these animals are inspirational. The New York Times Book Review: [Lost Animals, Disappearing Worlds](#) Barbara Allen, 2025-06-12 A moving and motivating collection of portraits of extinct species revealing the profound implications of their disappearance. This book presents thirty-one extinct species through personal portraits. The intimate approach not only highlights each particular species but also explores the broader implications of losing a species forever. How do we honor such a loss? Can we grieve for species we never knew? These animals range from the well-known passenger pigeon, thylacine, and great auk to lesser-known creatures like the Arabian ostrich, Saint Helena earwig, and Bramble Cay melomys. Through her poignant portraits, Barbara Allen not only tugs on the heartstrings but also aims to inspire readers to protect vulnerable and endangered species today, motivating us to play a positive role in conserving our planet's biodiversity.

The Practice of Sustainable Tourism Michael Hughes, David Weaver, Christof Pforr, 2015-06-19 Sustainable tourism is a widely used term that has accumulated considerable attention from researchers and policy makers over the past two decades. However, there is still an apparently wide gap between theory and practice in the area. Recent scholarly research has tended to focus on niche areas of alternative tourism rather than address the broader issues and vagaries and paradoxes that appear to plague the broader notion of sustainable tourism. As such, there is a need for a new and pragmatic analysis of sustainable tourism as an overarching idea and how this manifests in practice. *The Practice of Sustainable Tourism* fulfils this need by offering a fresh perspective on sustainable tourism as an umbrella concept with inherent tensions. It presents a way of thinking about tourism based on the notion of finding common ground using the dialectic tradition of philosophy. Dialectics focusses on resolving opposing viewpoints by recognising they have common elements that can be combined into a rational

and practical solution over time As part of this approach the book examines the strongly apparent tensions within alternative tourism as well as the paradox of continuing growth and other mass tourism related issues It is divided into three parts Part I includes chapters discussing the general concept of sustainable tourism its history current status and possible futures Part II includes a range of destination case studies exploring how sustainable tourism has been applied and Part III includes perspectives from the tourism operator view Given the international content and challenging themes the book will be appealing internationally to students researchers and academics in the fields of tourism geography sustainability and social science

Imagining Extinction Ursula K. Heise, 2016-08-10 We are currently facing the sixth mass extinction of species in the history of life on Earth biologists claim the first one caused by humans Activists filmmakers writers and artists are seeking to bring the crisis to the public's attention through stories and images that use the strategies of elegy tragedy epic and even comedy *Imagining Extinction* is the first book to examine the cultural frameworks shaping these narratives and images Ursula K Heise argues that understanding these stories and symbols is indispensable for any effective advocacy on behalf of endangered species More than that she shows how biodiversity conservation even and especially in its scientific and legal dimensions is shaped by cultural assumptions about what is valuable in nature and what is not These assumptions are hardwired into even seemingly neutral tools such as biodiversity databases and laws for the protection of endangered species Heise shows that the conflicts and convergences of biodiversity conservation with animal welfare advocacy environmental justice and discussions about the Anthropocene open up a new vision of multispecies justice Ultimately *Imagining Extinction* demonstrates that biodiversity endangered species and extinction are not only scientific questions but issues of histories cultures and values

Eco-Sonic Media Jacob Smith, 2015-06-05 The negative environmental effects of media culture are not often acknowledged the fuel required to keep huge server farms in operation landfills full of high tech junk and the extraction of rare minerals for devices reliant on them are just some of the hidden costs of the contemporary mediascape *Eco Sonic Media* brings an ecological critique to the history of sound media technologies in order to amplify the environmental undertones in sound studies and turn up the audio in discussions of greening the media By looking at early and neglected forms of sound technology Jacob Smith seeks to create a revisionist ecologically aware history of sound media Delving into the history of pre electronic media like hand cranked gramophones comparatively eco friendly media artifacts such as the shellac discs that preceded the use of petroleum based vinyl early forms of portable technology like divining rods and even the use of songbirds as domestic music machines Smith builds a scaffolding of historical case studies to demonstrate how green media archaeology can make sound studies vibrate at an ecological frequency while opening the ears of eco criticism Throughout this eye opening and timely book he makes readers more

aware of the costs and consequences of their personal media consumption by prompting comparisons with non digital non electronic technologies and by offering different ways in which sound media can become eco sonic media In the process he forges interdisciplinary connections opens new avenues of research and poses fresh theoretical questions for scholars and students of media sound studies and contemporary environmental history **Re-Thinking Agency** Joanna

Godlewicz-Adamiec, Paweł Piszczatowski, 2024-10-07 The book explores the multi faceted nature of contemporary reflections on agency focusing on various discursive practices that shape the posthumanist approach to the relationship between the human and non human world from a planetary perspective The chapters delve into critical human animal studies examine new non anthropocentric identity constructs and offer analyses that reinterpret meanings through semiotic inversions and challenge static cultural patterns The book concludes with discussions on decolonization practices that aim to liberate agency from oppressive systems particularly those dominated by imperial phallogocentrism **Doctor Who** ,

Environmental Security and Gender Nicole Detraz, 2014-08-21 Over the past 20 years scholars policymakers and the media have increasingly recognized the links between both traditional and non traditional security issues and the changing condition of the global environment Concepts such as environmental security and resource conflict have been used to hint at these significant linkages While there has been a good deal of scholarly work conducted that seeks to identify the ways that actors link these concepts there has been little examination of the intersection between approaches to environmental security and gender This book explores this intersection to provide an insight into the gendered nature of both global environmental politics and security studies It examines how the issues of security and the environment are linked to theory and practice and the extent to which gender informs these discussions By adopting a feminist environmental security discourse this book provides crucial redefinitions of key concepts and offers new insights into the ways we understand security environment connections Case studies evaluate if and how environment and security discourses are being used to understand a range of environmental issues and how a feminist environmental security discourse contributes to our understanding of security environment connections This multidisciplinary volume draws on literature from the environmental sciences security studies and sociology to highlight the complex human insecurities that often accompany environmental change As conceptualizations of security continue to shift and broaden to include environmental issues and concerns it is imperative that gender informs the debate Listener and BBC Television Review , 1990-10 *Last Chance to See* Douglas
