Vocational Education and Training in Times of Economic Crisis Matthias Pilz, 2016-12-20 This book brings together a broad range of approaches and methodologies relevant to international comparative vocational education and training VET Revealing how youth in transition is affected by economic crises it provides essential insights into the strengths and weaknesses of the various systems and prospects of VET in contexts ranging from North America to Europe e.g. Spain Germany or the UK to Asia such as China Thailand and India Though each country examined in this volume is affected by the economic crisis in a different way the effects are especially apparent for the young generation In many countries the youth unemployment rate is still very high and the job perspectives for young people are often limited at best The contributions in this volume demonstrate that VET alone cannot solve these problems but can be used to support a smooth transition from school to work If the quality of VET is high and the status and job expectations are good VET can help to fill the skills gap especially at the intermediate skill level Furthermore VET can also offer a realistic alternative to the university track for young people in many countries *Educating Engineers for Future Industrial Revolutions* Michael E. Reskilling America Katherine S. Newman,Hella Winston,2016-04-19 From Katherine Newman award winning author of No Shame in My Game and sociologist Hella Winston a sharp and irrefutable call to reenergize this nation s long neglected system of vocational training After decades of off shoring and downsizing that have left blue collar workers obsolete and stranded the United States is now on the verge of an industrial renaissance Companies like Apple BMW Bosch and Volkswagen are all opening plants and committing millions of dollars to build products right here on American soil The only problem we don t have a skilled enough labor pool to fill these positions which are in many cases technically demanding and require specialized skills A decades long series of idealistic educational policies with the expressed goal of getting every student to go to college has left a generation of potential workers out of the system Touted as a progressive egalitarian institution providing opportunity even to those with the greatest need the American secondary school system has in fact deepened existing inequalities leaving behind millions of youth especially those who live in the de industrialized Northeast and Midwest without much of a future at all We can do better argue acclaimed sociologists Katherine Newman and Hella Winston Taking a page from the successful experience of countries like Germany and Austria where youth unemployment is a mere 7% they call for a radical reevaluation of the idea of vocational training long discredited as an instrument of tracking The United States can prepare a new high performance labor force if we revamp our school system to value industry apprenticeship and rigorous technical education By doing so we will not only be able to meet the growing demand for skilled employees in dozens of sectors where employers decry the absence of well trained workers we will make the American Dream accessible to all

Collective Skill Formation in the Knowledge Economy Giuliano Bonoli,Patrick Emmenegger,2022-09-22 Interest in collective skill formation systems has been high for a long time but recent structural economic and societal developments have led commentators to question their viability In particular the shift

towards a knowledge economy creates a number of challenges for these highly praised systems of vocational training. These challenges relate to the growing importance of knowledge intensive production in advanced economies and with the accelerated pace of change due to innovation and globalization. What is more these issues are compounded by coinciding developments in growing inequality and the emergence of multicultural societies. Can collective skill formation systems adapt fast enough to the needs of the knowledge economy? Can they continue to be as successful as they have been in the past in integrating youth in the labour market? Will employers be willing to participate in the delivery of vocational training in this new context? In this book a world class team of leading experts on collective skill formation systems provide a thorough discussion of these and other questions raised by the shift to a knowledge economy. The book argues that collective skill formation systems remain attractive for firms and governments. However continuous and profound adjustments will be needed if they are to fulfil their objectives in terms of equity and efficiency. *Apprentice Nation* Ryan Craig, 2023-11-07

College isn't for everyone. It's time to challenge the status quo and embrace the potential of apprenticeships in tech, healthcare, finance and more, which can provide a sustainable pathway to economic opportunity. For decades, college has been the only respectable way to access the world of work, despite paralyzing tuition and a dire lack of practical skills that has left 40 percent of college graduates underemployed, unfulfilled, and struggling to repay student loan debt. Education and workforce expert Ryan Craig explores how a modern apprenticeship system will allow students and job seekers to jump start their careers by learning while they earn, ultimately leading to greater workforce diversity and geographic mobility. With a deep dive into the history behind America's outdated college system, Craig reveals the origins of the student debt crises and admissions scandals. Why apprenticeships are an effective pathway to career opportunity. What America can do to catch up with other nations making apprenticeship opportunities broadly available. Where students and job seekers can go to land an apprenticeship. Featuring a directory of US apprenticeship programs by industry and location, *Apprentice Nation* is an accessible blueprint for a country where young Americans of all backgrounds can launch careers in a variety of in-demand fields. With just a few common sense changes to education and workforce development, an apprentice nation will put the American Dream within reach for everyone. **Economic Survey**, 2018 **Second Report of the Royal Commissioners on Technical Instruction: Notes on technical education in Russia** Great Britain.
