Malaysian Standards Handbook on Processes in the Food Industry, 2005 *Halal Food Certification and Business Performance in Malaysia* Dr. Mohamed Syazwan Ab Talib, Dr. Thoo Ai Chin, Prof. Dr. Abubakar Abdul Hamid, 2018-08-01 Halal food certification plays a pivotal role in both consumers food purchase and consumption and food manufacturers business conducts The growing trends of Halal food have encouraged firms to implement Halal food certification Numerous studies have recognized the importance of Halal food certification to consumers rather than Halal food manufacturers However Halal food certificate motivations implementation and the impact on firm performance particularly the Malaysia Standard on Halal Food MS1500 2009 are hardly examined Therefore this study aims to investigate the motivations behind Halal food certification and its impact on food manufacturers operational

marketing and financial performances Resource based view and institutional theory underpin the proposed conceptual framework of the study Five hypotheses were proposed to determine the relationships between certification motivations and firm performances A quantitative methodology was adopted and data were collected using self administered questionnaires A total of 210 Halal certified food manufacturing companies in Peninsular Malaysia participated in the survey A partial least square structural equation modeling was conducted for data analysis A key finding is that both the external and internal motivations positively influence Halal food certificate implementation Moreover it was also found that implementing Halal food certification has a positive relationship with firm performance Further findings indicated that government intervention consumer demand industry competition employee commitment operation improvement and marketing return are significant motivators for Halal food certificate implementation Results also revealed that Halal food certification has a significant impact on the respondents operation marketing and financial performances Theoretically this study offers insights to the significance of consumer pressure as a normative isomorphism in the institutional theory Additionally this study reinforces the understanding of Halal food certification as a significant and relevant strategic tool to remain competitive within the profoundly homogenous and saturated food industry Practically the information gained from this research could potentially be beneficial to encourage non certified firms to become Halal certified Future research are encouraged to study the motives and impact of Halal food certification from various countries as well as apply this research across other industries like pharmaceutical tourism or cosmetic
