Images of the Byzantine World Angeliki Lymberopoulou, 2016-12-05 The main themes of this volume are the identification of visions messages and meanings in various facets of Byzantine culture and the possible differences in the perception of these visions messages and meanings as seen by their original audience and by modern scholars The volume addresses the methodological question of how far interpretations should go whether there is a tendency to read too much into too little or whether not enough attention is paid to apparent minutiae that may have been important in their historical context As the essays span a wide chronological era they also present a means of assessing the relative degrees of continuity and change in Byzantine visions messages and meanings over time Thus as highlighted in the concluding section the book discusses the validity of existing notions regarding the fluidity of Byzantine culture when continuity was a matter of a rigid adherence to traditional values and when a manifestation of the ability to adapt old conventions to new circumstances and it shows that in some respects Byzantine cultural history may have been less fragmented than is usually assumed Similarly by reflecting not just on new interpretations but also on the process of interpreting itself the contributors demonstrate how research within Byzantine studies has evolved over the past thirty years from a set of narrowly defined individual disciplines into a broader exploration of interconnected cultural phenomena

Clemente, Jose C. Jimenez-Lopez, 2021-05-07 Legume crops provide a significant sources of plant based proteins for humans Grain legumes present outstanding nutritional and nutraceutical properties as sources of bioactive components with benefits in human health while they are affordable food that contributes to achieving future food and feed security Furthermore they are major ingredients in the Mediterranean diet playing a vital role in developing countries Global food security requires a major re focusing of plant sciences crop improvement and production agronomy towards grain legumes pulse crops over coming decades with intensive research to identify cultivars with improved grain characteristics helping to develop novel legume derived products foods adapted to today consumer preference In this context studies dealing with legume processing impact such as soaking boiling microwave cooking germination and fermentation among others in their nutritional and anti nutritional i e food allergy properties are of great interest in these future food developments This Research Topic aims to bring together a collection of studies for a better understanding of current research in legume seed compounds functional properties to provide an updated and global vision of the importance of legumes in human health Chemical/Instrumental Approaches to the Evaluation of Wine Chemistry Rosa Perestrelo, José S. Câmara, 2020-05-27 Wine is a widely consumed

beverage due to its unique and pleasant sensory properties Wine is composed of more than one thousand chemical

compounds e.g. alcohols, esters, acids, terpenoids, phenolic compounds, flavonoids, anthocyanins, minerals and vitamins among others resulting from several chemical and biochemical processes. Microextraction techniques in tandem with high resolution analytical instruments have been applied by wine researchers to expand the knowledge of wine's chemical composition with the purposes of improving wine quality, supporting winemaker decisions related to the winemaking process and guaranteeing the authenticity of wine. As a result, we proposed *Chemical Instrumental Approaches to the Evaluation of Wine Chemistry* as a topic for a Special Issue in *Molecules*. This Special Issue aims to provide an update on state-of-the-art extraction procedures e.g. solid phase microextraction (SPME) and analytical tools e.g. nuclear magnetic resonance (NMR), inductively coupled plasma mass spectrometry (ICP-MS), ultra-performance liquid chromatography tandem mass spectrometry (UPLC-MS/MS), emphasizing their use as suitable platforms for the establishment of the chemical composition of wine, volatile profile, antioxidants, phenolic pattern and elemental composition among others. Information related to wine sensorial properties, contaminants, authenticity and chemometric tools used for data treatment are described in this Issue.

Raul Antonio Sperotto, Felipe Klein, Ricachenevsky, Elizabeth R. Waters, Guihua Bai, Magdalena Arasimowicz-Jelonek, 2022-02-24. *The metabolic pathways and environmental controls of hydrocarbon biodegradation in marine ecosystems*. Joel E. Kostka, Andreas P. Teske, Samantha B. Joye, Ian Head, 2015-05-15. Biodegradation mediated by indigenous microbial communities is the ultimate fate of the majority of oil hydrocarbon that enters the marine environment. The aim of this Research Topic is to highlight recent advances in our knowledge of the pathways and controls of microbially catalyzed hydrocarbon degradation in marine ecosystems with emphasis on the response of microbial communities to the Deepwater Horizon oil spill in the Gulf of Mexico. In this Research Topic, we encouraged original research and reviews on the ecology of hydrocarbon-degrading bacteria, the rates and mechanisms of biodegradation and the bioremediation of discharged oil under situ as well as near in situ conditions.

International Journal of Systematic and Evolutionary Microbiology, 2009. **Endocrine Disruptors**, 2014-01-02. First published in 1943, *Vitamins and Hormones* is the longest running serial published by Academic Press. The Series provides up-to-date information on vitamin and hormone research spanning data from molecular biology to the clinic. A volume can focus on a single molecule or on a disease that is related to vitamins or hormones. A hormone is interpreted broadly so that related substances such as transmitters, cytokines, growth factors and others can be reviewed. This volume focuses on endocrine disruptors. Expertise of the contributors. Coverage of a vast array of subjects. In-depth current information at the molecular to the clinical levels. Three-dimensional structures in color. Elaborate signaling pathways. Transverse Disciplines in Metrology. French College of Metrology, 2009-03-23. Based on The International Metrology Congress meeting, this reference examines the evolution of metrology and its applications in industry, environment and safety, health and medicine, economy and quality and new information and communication.
