

## MicroTech II

Frame 4 Screw chiller air cooled ALS, water cooled PFS and WHS are managed by MicroTech II controllers.

Each refrigerant circuit is managed by a I/O board and a Driver for Alco EXV ( for example ALS with 3 refrigerant circuits has 3 I/O boards and 3 Driver for EXV). For each unit there is also one board for the terminal.

Every board (of a unit) is connected to the local network  $\mu$ LAN™ link and one I/O board acts as master, the others I/O boards act as slaves ( for example ALS with 3 refrigerant circuits is managed by 1 I/O MASTER board and 2 I/O SLAVE boards).

$\mu$ LAN means Microprocessor Local Area Network.

It is a RS485 serial connection.

The devices connected to  $\mu$ LAN can share information, variables, measurements and terminals.

In this way MicroTech II becomes expandible and modularity is possible.

## Applications and functions carried out by the MicroTech II

### Control section - main features:

- Management of the compressor capacity slide and fans modulation according to the distributed multiprocessor logic system ( $\mu$ LAN™) link system.
- Chillers enabled to work in partial failure condition thanks to the distributed multiprocessor logic system ( $\mu$ LAN™) link system
- Full routine operation at condition of:
  - High ambient temperature value
  - High thermal load
  - High evaporator entering water temperature (start-up)
- Display of evaporator entering/leaving water temperature
- Display of condensing-evaporating temperature and pressure, superheat temperature for each circuit.
