Input in English-Medium Instruction Francesca Costa,Cristina Mariotti,2023-03-07 This edited book investigates the input provided by lecturers in English Medium Instruction EMI to reveal the characteristics of both written and oral inputs in EMI settings and their pedagogical implications The book works on two assumptions firstly that field exposure to input is the prime mover of the teaching learning process and secondly that its quality is fundamental for the development of discipline specific knowledge with particular reference to university settings The volume is timely as it contains original research addressing both theoretical reflections and practical information on how content lecturers can enhance the effectiveness of their teaching practice through English including a relatively unexplored

and increasingly relevant topic represented by the synergy between spoken input and written and multimodal materials. Moreover, it provides insight for EAP teachers and EMI training professionals into how lecturer training programmes and activities can be improved by focusing on communicative functions and presentation strategies that can selectively address and improve students' mastery of disciplinary discourse.

Applied Linguistics Perspectives on CLIL Ana Llinares, Tom Morton, 2017-03-16 This book represents the first collection of studies on Content and Language Integrated Learning (CLIL) which brings together a range of perspectives through which CLIL has been investigated within Applied Linguistics. The book aims to show how the four perspectives of Second Language Acquisition (SLA), Systemic Functional Linguistics (SFL), Discourse Analysis and Sociolinguistics highlight different important aspects of CLIL as a context for second language development. Each of the four sections in the book opens with an overview of one of the perspectives written by a leading scholar in the field and is then followed by three empirical studies which focus on specific aspects of CLIL seen from this perspective. Topics covered include motivation, the use of tasks, pragmatic development, speech functions in spoken interaction, the use of evaluative language in expressing content knowledge in writing, multimodal interaction, assessment for learning, L1 use in the classroom, English medium instruction in universities and CLIL teachers' professional identities.

Board Games in the CLIL Classroom Thomai Alexiou, Athanasios Karasimos, 2023-12-18 The present book explores how modern board gaming and language teaching can be beneficially combined to achieve optimal impact. Modern board games have a lot to offer language learners and teachers and they should play a much more significant role in what has been labelled Content and Language Integrated Learning or CLIL. Modern board games require cooperation, problem solving, active discovery, interpretation and analysis. Most importantly, modern board games allow students to explore a hypothetical environment without the risk of language errors. The key ingredient of the present book is game-based learning and teaching theory or GBLTT, a theoretical framework which measures learning outcomes based on gaming and learning procedures. GBLTT is focused on balancing information and gameplay as well as putting a focus on the ability of each learner to retain language competence and to put their subject to realistic situations.

The Roles of Language in CLIL Ana Llinares, Tom Morton, Rachel Whittaker, 2012-03-15 This book provides a theoretically based approach to the integration of language and content in primary and secondary contexts. Drawing on their wide experience as CLIL educators and researchers, the authors explore data collected in real CLIL classrooms from two interrelated perspectives: the CLIL classroom as an interactional context for developing language and content and the genres and registers through which the meanings of the different academic subjects are enacted. From the analysis of this corpus of data, the authors provide a rich description of how CLIL students' language works and may be expected to develop. Also available separately as a hardback.

Discourse and language learning across L2 instructional settings , 2012-01-01 Studies on discourse and

language learning originated in the field of general education and they focused on first language learning environments. However, since the 1980s, research on discourse and language learning broadened the scope of investigation to respond to second and foreign language environments. Recently, the emergence of new language learning contexts such as computer-mediated communication, multilingual settings or content and language integrated contexts requires further research that focuses on discourse and language learning. From this perspective, the present volume aims to broaden the scope of investigation in foreign language contexts by exploring discourse patterns in the classroom and examining the impact of factors such as gender, explicitness of feedback or L1 use on language learning through discourse. With that aim in mind, this volume will bring together research that investigates discourse in various instructional settings, namely those of primary, secondary and university L2 learning environments, content and language integrated contexts and other new language learning settings. The number and variety of languages involved, both as the first language (e.g. English, Finnish, Basque, Spanish, Japanese, French, Italian, Catalan) as well as the target foreign language (e.g. English, French, Italian, Japanese, Spanish), makes the volume specially attractive. Additionally, the different approaches adopted by the researchers participating in this volume, such as information processing, sociocultural theory or conversation analysis, widen the realm of investigation on discourse and language learning. Finally, the strength of the volume also lies in the range of educational settings (primary, secondary and tertiary education) and the worldwide representation of contributors across seven different countries, namely those of Spain, France, Austria, Finland, Germany, Canada, Australia and the United States. The uniqueness of the volume is due to its eclectic and comprehensive nature in tackling instructional discourse. Worldwide outstanding researchers like Julianne House, Carme Muñoz, Ute Smit, Tarja Nikula or Roy Lyster to quote but a few, adopt different perspectives in this joint contribution that will certainly broaden the scope of research on language learners' discourse.

Peer Interactions in New Content and Language Integrated Settings Nathan J. Devos, 2015-11-04. Trade schools, universities and programs for international students have begun to experiment with Content and Language Integrated Learning (CLIL) as a viable pedagogy for instruction, as the pedagogy of CLIL increasingly gains recognition as a practical form of language and content education in Europe and beyond, and its application in instructional settings becomes more diverse. Corresponding with CLIL's growth, this book focuses on foreign language use during peer interactions in a new CLIL setting. It particularly concentrates on how to conduct research when the focus is on learner interactions. The theoretical background, research methods and research instruments are explained in a brief and understandable manner. This book is intended for those interested in CLIL and peer interactions and includes a framework and ideas for investigating new CLIL contexts in a practical manner, allowing undergraduate and graduate students to conduct their own research in these settings.
