Transactions on Computational Science XXXVI Marina L. Gavrilova, C.J. Kenneth Tan, Alexei Sourin, 2020-03-10 The LNCS journal Transactions on Computational Science reflects recent developments in the field of Computational Science conceiving the field not as a mere ancillary science but rather as an innovative approach supporting many other scientific disciplines. The journal focuses on original high quality research in the realm of computational science in parallel and distributed environments encompassing the facilitating theoretical foundations and the applications of large scale computations and massive data processing. It addresses researchers and practitioners in areas ranging from aerospace to biochemistry from electronics to geosciences from mathematics to software architecture presenting verifiable computational methods findings and solutions and enabling industrial users to apply techniques of leading edge large scale high performance computational methods. This the 36th issue of the Transactions on Computational Science is devoted to the area of Cyberworlds and Cybersecurity. The first four papers constitute extended versions of selected papers presented at the 2018 International Conference on Cyberworlds CW 2018. A further two papers were accepted following an open Call for Papers and cover the areas of fast 3D segmentation using geometric surface features and nature inspired optimization for face recognition. **My**

Mathematical Universe: People, Personalities, And The Profession Krishnaswami Alladi, 2022-11-15 This is an autobiography and an exposition on the contributions and personalities of many of the leading researchers in mathematics and physics with whom Dr Krishna Alladi Professor of Mathematics at the University of Florida has had personal interaction with for over six decades. Discussions of various aspects of the physics and mathematics academic professions are included. Part I begins with the author's unusual and frequent introductions as a young boy to scientific luminaries like Nobel Laureates Niels Bohr, Murray Gell Mann and Richard Feynman in the company of his father the scientist Alladi Ramakrishnan. Also in Part I is an exciting account of how the author started his research investigations in number theory as an undergraduate and how contact and collaboration with the great Paul Erdős as a student influenced him in his career. In depth views of the Institute for Advanced Study Princeton and several major American Universities are given and fascinating descriptions of the work and personalities of some Field Medalists and eminent mathematicians are provided. Part II deals with the author's tenure at the University of Florida where he initiated several programs as Mathematics Chair for a decade and how he has served the profession in various capacities most notably as Chair of the SASTRA Ramanujan Prize Committee and Editor in Chief of The Ramanujan Journal. The book would appeal to academicians and the general public since the author has blended academic and scientific discussions at a non technical level with descriptions of destinations in his international travels for work and pleasure. The reader is invited to dig as deep as desired and is guaranteed to be treated to whimsical stories and personal peeks at some of the great luminaries of the twentieth and twenty first centuries. **Notices of the American Mathematical Society** American Mathematical Society, 1973 Scientific and Technical Books and

 Lars Ahlfors,1979 A standard source of information of functions of one complex variable this text has retained its wide
 popularity in this field by being consistently rigorous without becoming needlessly concerned with advanced or
 overspecialized material Difficult points have been clarified the book has been reviewed for accuracy and notations and
 terminology have been modernized Chapter 2 Complex Functions features a brief section on the change of length and area
 under conformal mapping and much of Chapter 8 Global Analytic Functions has been rewritten in order to introduce readers
 to the terminology of germs and sheaves while still emphasizing that classical concepts are the backbone of the theory
 Chapter 4 Complex Integration now includes a new and simpler proof of the general form of Cauchy s theorem There is a
 short section on the Riemann zeta function showing the use of residues in a more exciting situation than in the computation
