The International Convention for the Prevention of Pollution from Ships Henrik Ringbom, Aldo Chircop, 2025-02-12 This Commentary presents an in depth exploration of what is widely regarded as the most important International Maritime Organization IMO convention on vessel source pollution Leading international experts provide an authoritative analysis of the International Convention for the Prevention of Pollution from Ships 1973 78 and its subsidiary instruments collectively known as MARPOL *Lloyd's Ship Manager*, 1985-04

Sea-Bed Energy and Minerals: The International Legal Regime E.D. Brown, 2023-08-28 This first book in a three volume work on Sea Bed Energy and Minerals The International Legal Regime is concerned with the law governing the exploitation of energy and mineral resources in two quite different sub marine areas Volume 1 deals with the areas within the limits of national jurisdiction that is all of the submarine areas extending from the coast to the seaward limit of the continental shelf As its subtitle indicates this volume is predominantly concerned with The Continental Shelf Although the United Nations Convention on the Law of the Sea has still not entered into force and indeed may not do so for many years for some of the major maritime powers its adoption in 1982 did nonetheless usher in a period of relative stability in the rules governing the areas within national jurisdiction including in particular the continental shelf However being the creatures of compromise some of its rules are undeniably vague and it has been left to State practice and international courts and tribunals to develop these rules further especially those relating to the delimitation of the continental shelf between neighbouring States Volume 1 provides an analysis of the rules of conventional and customary law in the light of this practice Volume 2 on Sea Bed Mining deals with the area beyond the limits of national jurisdiction that is the submarine area lying seaward of the outer limit of the continental shelf Volume 3 which will be published at the same time as Volume 2 will provide Documents Tables and Bibliography relating to the subject matter of the first two volumes

Saving the Oceans Through Law James Harrison, 2017-10-27 The oceans cover more than seventy per cent of the surface of the planet and they provide many vital ecosystem services However the health of the world's oceans has been deteriorating over the past decades and the protection of the marine environment has emerged as one of the most pressing legal and political challenges for the international community An effective solution depends upon the cooperation of all states towards achieving agreed objectives This book provides a critical assessment of the role that international law plays in this process by explaining and evaluating the various legal instruments that have been negotiated in this area as well as key trends in global ocean governance Starting with a detailed analysis of the United Nations Convention on the Law of the Sea the book considers the main treaties and other legal texts that seeks to prevent reduce and control damage to the marine environment caused by navigation seabed exploitation fishing dumping and land based activities as well as emerging pressures such as ocean noise and climate change The book demonstrates how international institutions have expanded their mandates to address a broader range of marine environmental issues beyond basic problems

of pollution control to include the conservation of marine biological diversity and an ecosystems approach to regulation It also discusses the development of diverse regulatory tools to address anthropogenic impacts on the marine environment and the extent to which states have adopted a precautionary approach in different maritime sectors Whilst many advances have been made in these matters this book highlights the need for greater coordination between international institutions as well as the desirability of developing stronger enforcement mechanisms for international environmental rules **Federal**

Register ,1986 **Principles of International Environmental Law** Philippe Sands,2003-10-09 This second edition of Philippe Sand s leading textbook on international environmental law provides a clear and authoritative introduction to the subject revised to December 2002 It considers relevant new topics including the Kyoto Protocol genetically modified organisms oil pollution chemicals etc and will remain the most comprehensive account of the principles and rules relating to environmental protection and the conservation of natural resources In addition to the key material from the 1992 Rio Declaration and subsequent developments Sands also covers topics including the legal and institutional framework the field s historic development and standards for general application This will continue to be an invaluable resource for both students and practitioners alike Publications of the International Maritime Organization International Maritime Organization,1991
