This book will describe the why and how to start or expand a video gaming program in the library including some specific examples of how to target adult and female gamer patrons. Gaming supplies more than just visual stimulation and empty entertainment; it can also promote socialization as well as the learning of both traditional and new literacies required to succeed in the modern world. Problem solving, multi-tasking, complex decision making on the fly, and reading the combination of words and graphics are vital skills for the 21st century, all of which are required to play video games. *Crash Course in Gaming* discusses the pros and cons of gaming, the types of games and game systems, circulating collections, and game programs. It explains how a library's video game program can and should do much more than simply draw younger users to the library, providing examples of how everyone from parents to senior citizens can benefit from a patron-oriented computer gaming program.
