

During a call, you can alternate between handset, headset, or speakerphone modes by picking up the handset, or pressing **[L]** or **[H]**. For example, if you're using the handset, you can switch to headset mode by pressing **[L]**, or switch to speakerphone mode by pressing **[H]**.

When you're in speakerphone mode, **[H]** glows green. When you're in headset mode, **[L]** glows green if an analog headset is connected, and blue if a USB headset is connected. If both an analog and USB headset are connected, the USB headset will be used.

Troubleshooting: Why Doesn't the Speakerphone Work?

If your speakerphone doesn't work, your system administrator may have disabled it. You must handle calls using the handset or a headset. If your system administrator disables the speakerphone on your phone, *Handsfree mode disabled* appears on the touchscreen after you press **[H]**.

User Tip: Setting Up the Phone to Automatically Use Your Headset for All Calls

If you frequently use a headset, you can make the headset the default call path. To set this up, see [Enabling Headset Memory Mode](#).

Answering Calls

All incoming calls display in an Incoming Call window, as shown next.

To answer the call, do one of the following:

- To use the handset, pick up the handset.
- To use the speakerphone, press **[H]** or tap **Answer**.
- To use your headset, press **[L]**.

If you're already in handset, speakerphone, or headset mode, tap **Answer**, and the phone will automatically use the mode you're in.
