Engineers create many of the inventions that shape our society and as such they play a vital role in determining how we live. This new book does an outstanding job of filling in the knowledge and perspective that engineers must have to be good citizens in areas ranging from the environment to intellectual property to ensuring the health of the innovation ecosystem that has done so much for modern society. This is exactly the sort of book that engineers and those who work with them should read and discuss over pizza, coffee or some other suitable discussion provoking consumable. John L. Hennessy, president Stanford University. *Citizen Engineer* is the bible for the new era of socially responsible engineering. It's an era where as the authors show engineers don't just need to know more they need to be more. The work is an inspiration, an exhortation and a practical how to guide. All engineers concerned with the impact of their work and that should be all engineers must read this book. Hal Abelson, professor of computer science and engineering MIT. Code is law. Finally a map to responsible law making. This accessible and brilliant book should be required of every citizen and especially the new citizen lawmakers we call engineers. Lawrence Lessig, director Safra Center for Ethics Harvard University and cofounder Creative Commons. Being an engineer today means being far more than an engineer. You need to consider not only the design requirements of your projects but the full impact of your work from an ecological perspective, an intellectual property perspective, a business perspective and a sociological perspective. And you must coordinate your efforts with many other engineers, sometimes hundreds of them. In short we've entered an age that demands socially responsible engineering on a whole new scale. The era of the Citizen Engineer. This engaging and thought provoking book written by computer industry luminaries David Douglas and Greg Papadopoulos focuses on two topics that are becoming vitally important in the day to day work of engineers: eco engineering and intellectual property IP. *Citizen Engineer* also examines how and why the world of engineering has changed and provides practical advice to help engineers of all types master the new era and start thinking like Citizen Engineers. PC Magazine, 2002. *Journal of Soil and Water Conservation*, 2014 Vol 25 no 1 contains the society's Lincoln Chapter's Resource conservation glossary. Management & References, 2010. *The Software Catalog*, 1986.
