Power Instrumentation for the Dental Professional with Navigate Advantage Access Lisa Mayo, 2023-02-15 The field of dental ultrasonics and air polishing has become mainstream as the technology has evolved Power Instrumentation for the Dental Professional aims to bridge the gap of knowledge between education and clinical practice by allowing the student to acquire the knowledge needed to implement power technology effectively into patient care with a contemporary approach to preventive maintenance and non surgical periodontal procedures As with any form of clinical practice power instrumentation is best learned through continued repetition The exercises in this textbook allow you to move at your own pace to gain proficiency The videos that accompany the text will provide you with a chairside instructor that you can watch multiple times while developing your clinical skills

A Textbook of Perioperative Care Kate Woodhead, Paul Wicker, 2005-05-18 Woodhead and Wicker's new text will be the foremost reference source for all perioperative practitioners The content mirrors the dynamics of modern perioperative practice by focusing on surgical interventions in all the environments in which it is currently practised including A this book does not attempt to reflect the needs of all specialties but instead concentrates on the principles of practice applicable to any setting and any specialty It has a very practical focus it aims to be the book that nurses and ODPs reach for in order to answer their practical questions but is not procedure driven Instead it sets out the principles of perioperative practice from which practitioners will be able to develop their own practice techniques Reflects principles of practice applicable to any perioperative environment Strong practical focus Edited by two of the biggest names in the international perioperative nursing sphere with contributions from other well known and authoritative sources Excellent opportunities to develop links with the National Association of Theatre Nurses and the European Operating Room Association The team of contributors are experienced practitioners working directly with perioperative patients or in perioperative education An original model for ethical practice is proposed the Reid model is the first such ethical model to be proposed for the perioperative environment Includes one of the only chapters in any perioperative book which specifically focuses on the care of the elderly The research chapter encourages the use of evidence based practice and the development of perioperative research The unique chapter on care of the mentally ill will support practitioners who are not qualified in psychiatry to care for mentally ill patients This is an area where there is a great information deficit Key points listed for each chapter Sections have been completely revised from previous edition key subject areas now stand alone chapters rather than sections within much larger chapters creates ease of access for user Change of editorship Recognises the diversity of perioperative environments much more explicitly than previous edition
