Role and Change to comply with their legal duties under the law namely to ensure the health of workers The suggestions on what can be done to tackle organizational stress are generally instructive and intended specifically for employers of today s globalized organizations By analyzing case studies in the MS domains Demands Control and Change that describe socio technical and psychosocial interventions in workplaces I find evidence in support of the hypothesis that reducing the workload of employees introducing flexible work schedules and engaging in intense communication during times of change are effective in reducing work related stress in employees Besides other beneficial effects these interventions have the potential to increase job satisfaction reduce adrenalin levels and increase performance efficiency of workers I suggest that introducing regular risk assessments rewarding good practice providing specific assistance for small and medium sized enterprises and increasing the level of research activity in the area of occupational stress are strategies by which policymakers can encourage organizations to implement stress interventions
