John Wilson, 1881 *Virtualism* James G. Carrier, Daniel Miller, 2020-08-25 We live in a time of economic virtualism whereby our lives are made to conform to the virtual reality of economic thought Globalization transnational capitalism structural adjustment programmes and the decay of welfare are all signs of the growing power of economics one of the most potent forces of recent decades In the last thirty years economics has ceased to be just an academic discipline concerned with the study of economy and has come to be the only legitimate way to think about all aspects of society and how we order our lives Economic models are no longer measured against the world they seek to describe but instead the world is measured against them found wanting and made to conform This profound and dangerous change in the power of abstract economics to shape the lives of people in rich and poor countries alike is the subject of this interdisciplinary study Contributors show how economics has come to portray a virtual reality a world that seems real but is merely a reflection of a neo classical model and

how governments the World Bank and the IMF combine to stamp the world with a virtual image that condemns as irrational our local social and cultural arrangements Further it is argued that virtualism represents the worrying emergence of new forms of abstraction in the political economy of which economics is just one example *Handbook of Emerging Market Multinational Corporations* Mehmet Demirbag,Attila Yaprak,2015-02-27 The Handbook of Emerging Market Multinational Corporations focuses on why emerging market multinationals internationalize how they do so and the advantages they explore and exploit as they internationalize The Handbook highlights the requirement for **The Changing American Mind** William G. Mayer,1992 The dynamics of public opinion in America over the last three decades **Environmental Advertising in China and the USA** Xinghua Li,2016-05-05 Since the late 1980s green consumerism has been hailed in the West as an efficient solution to environmental problems However Chinese consumers have been slow to warm up to eco friendly products Consumers prefer SUVs to hybrid cars health supplements and snake oil medicines to organic foods and eco fashion is still secluded in high end designer studios These choices contradict the findings of many sustainable lifestyle surveys that claim to register a rising desire for green products among the Chinese This book examines the psycho cultural differences that disrupt the translation of eco friendly appeals to China by analyzing environmental advertising It explores the different notions of green the structures of desire that underlies the advertisements and how they are shaped by ideological cultural and historical differences Rather than arguing the superiority of the American or Chinese version of green consumerism the book interrogates the role of advertising in the global spread of Western ideologies and explores the possibilities for consumers to resist transnational corporate hegemony in the green movement This book fills an important gap in the critical scholarship on green marketing and should be of interest to students and scholars of environment studies green advertising and marketing environmental communication and media studies China studies and environmental sociology ethics and cultural studies *Labor Studies Journal* ,1992 **Can Journalism Be Saved?** Rachel Davis Mersey,2010-08-06 This book challenges the once dominant social responsibility model and argues that a new individual first paradigm is what will allow journalism to survive in today s crowded media marketplace By some measures it would seem that print journalism is dying Journalism recently suffered one of its worst circulation declines in years a drop of more than ten percent in the a six month period ending September 30 2009 The Rocky Mountain News in Denver CO closed its doors in 2009 after it dominated the AP awards in 2008 and was lauded for an investigative expose on unfair treatment of former nuclear workers Even the New York Times and the Washington Post are experiencing financial trouble But print advertising revenue still trumps online advertising revenue ten fold Is there hope yet for traditional journalism This book reviews the complicated challenge facing journalism tracing its 19th century community oriented origins and documenting the vast expansion of the news business via blogs and other Internet enabled outlets user generated content and news like alternatives The author argues that a radical shift in mindset striving to meet each individual s demands for what he wants to
