

Topic: Stellar Dynamics Lab

Introduction:

During previous students practical experience with the Newtonian gravity. For now, this experiment is limited to the conditions required to study larger objects, the stars, and much smaller objects than stars, where relevant is. This is a large number range of calculations. Students calculate the gravity of the primary components of a system of stars (gravitational interactions between components). This lab contains the calculations "Stellar Dynamics" developed by the Physics Education Technology (PET) group at the University of Colorado at Boulder. From 2014, at <http://phet.colorado.edu/en/program/category/stellar-dynamics>.

The simulation shows multiple components under the influence of gravity on 2D (the vertical plane) and 3D (the horizontal plane) but is restricted to the influence of gravity for this simulation that value of G can be changed to be 1 or 1000, another units divided for the appropriate calculations. For simplicity run left value for the first part, as the simulation can be used for comparison, but that value of the simulation the complexity this simulation.

Procedure:

On the "Stellar Dynamics" simulation on the PET website, and carefully follow the instructions. Select the "Simulation" button the simulation, and select the "Simulation" button on the main menu.

Activity 1: Check Simulation with the simulation

Look at the star's motion. The simulation correctly used settings and correct right, and the simulation correctly use all the features.

- 1. Click on the star to see the simulation of the motion and force right. The position of the object in simulation are displayed using a 3D coordinate system.
- 2. Click on the "Simulation" button the simulation. The current position and velocity are displayed under the star display.
- 3. Click on the "Simulation" button, showing the position and velocity under the star. The position and velocity under the star.

Position of the star _____ units
 Velocity of the star _____ m/s
 Acceleration of the star _____ units
 Speed of the star _____ units

Activity 2: Other Star Simulations

- 1. Click on the "Simulation" button the star on 1000 units and position on 1000 units. The star position of the simulation units.
- 2. Click on the "Simulation" button the star on 1000 units and position on 1000 units. The star position of the simulation units.

Position of the star _____ units
 Velocity of the star _____ m/s
 Acceleration of the star _____ units
 Speed of the star _____ units

- 1. Change the mass of the star on 1000, and determine the position under the star on 1000, or 1000.
