Knowing Tomorrow How Science Deals With The Future:

Knowing Tomorrow? Patrick A. Duin, 2007 In *Knowing Tomorrow* well known futures researchers from around the world e g Italy the U K the U S A the Netherlands Taiwan and Australia discuss how the future is being dealt with in different sciences They describe how scientists have incorporated the future in their theories thereby often taking a historical perspective The findings of this book can offer strong support to the scientific foundations of futures research and thus improve futures research as a scientific discipline **BOOK JACKET** **Knowing Tomorrow** Patrick van der Duin, 2007

Physics of the Future Michio Kaku, 2011-03-15 NATIONAL BESTSELLER The renowned theoretical physicist and national bestselling author of *The God Equation* details the developments in computer technology artificial intelligence medicine space travel and more that are poised to happen over the next century Mind bending An alternately fascinating and frightening book San Francisco Chronicle Space elevators Internet enabled contact lenses Cars that fly by floating on magnetic fields This is the stuff of science fiction it s also daily life in the year 2100 Renowned theoretical physicist Michio Kaku considers how these inventions will affect the world economy addressing the key questions Who will have jobs Which nations will prosper Kaku interviews three hundred of the world s top scientists working in their labs on astonishing prototypes He also takes into account the rigorous scientific principles that regulate how quickly how safely and how far technologies can advance In *Physics of the Future* Kaku forecasts a century of earthshaking advances in technology that could make even the last centuries leaps and bounds seem insignificant **Managing Technology Entrepreneurship and Innovation** Paul Trott, Dap Hartmann, Patrick van der Duin, Victor Scholten, J. Roland Ortt, 2015-12-14 *Managing Technology Entrepreneurship and Innovation* is the first textbook for non business based entrepreneurship courses focussed on students with a background in science and technology Its comprehensive rigorous and yet accessible approach originates from the authors considerable experience mentoring students as they turn their technological ideas into real life business ventures The text is separated into three parts providing a roadmap for successful entrepreneurial projects Part I focusses on how to create your venture turning technology into businesses and how to link together entrepreneurship and innovation Part II shows you how to grow your venture and make it profitable looking at the early development of academic spin outs and how to adapt your technology to the customers needs Part III takes you through the day to day running on your business whether to adopt a contingency or contextual approach how to develop new products and services and alternative options for growth With a wide range of practical steps lists of things to consider and guidelines on how to turn your technology based ideas into a successful business this text will be essential for all non business students who need to understand entrepreneurship management and innovation It will also prove a useful introduction to all Masters level students taking these subjects in business schools **Future Stories** David Christian, 2022-06-07 The New York Times bestselling author of *Origin Story* who Bill Gates has long been a fan of turns his attention to the future of humanity and how we think about it in this ambitious

book The future is uncertain a bit spooky possibly dangerous maybe wonderful We cope with this never ending uncertainty by telling stories about the future future stories How do we construct those stories Where is the future the place where we set those stories Can we trust our future stories And what sort of futures do they show us This book is about future stories and future thinking about how we prepare for the future Think of it as a sort of User s Guide to the Future We all need such a guide because the future is where we will spend the rest of our lives David Christian historian and author of *Origin Story* is renowned for pioneering the emerging discipline of Big History which surveys the whole of the past But with *Future Stories* he casts his sharp analytical eye forward offering an introduction to the strange world of the future and a guide to what we think we know about it at all scales from the individual to the cosmological Christian consults theologians philosophers scientists statisticians and scholars from a huge range of places and times as he explores how we prepare for uncertain futures including the future of human evolution artificial intelligence interstellar travel and more By linking the study of the past much more closely to the study of the future we can begin to imagine what the world will look like in a hundred years and consider solutions to the biggest challenges facing us all
