deployed both by registration bodies to verify an organisation's compliance with the standard and also by companies seeking registration who have to assess their system before being audited by an external body. Most of their time is spent walking around companies asking questions so there is a real need for a handy book to assist auditors on the move which will help jog the memory when planning an audit away from home. A book containing many lists and tables is the ideal solution. The first five chapters cover the auditing process first in outline and then more thoroughly the four phases of an audit. There then follow another seven chapters each intended to assist auditors in some aspect of their job. Also included are some statistics on ISO 9000 which auditors can use to help others, a bibliography and a dictionary of auditing terms placed at the back for ease of use. There are also anecdotal case studies throughout the text which illustrate in a memorable manner the key concepts being examined.

**Accountability and Effectiveness Evaluation in Nonprofit Organizations** James Cutt, Vic Murray, 2000-07-06 This unique volume provides new perspectives on assessing the performance of nonprofit organizations whilst meeting the information needs of decision makers both internal such as resource providers, regulators and clients and external including boards, managers, staff and volunteers. Whilst most discussions of accountability focus exclusively on financial accountability, this title offers a significant contribution to a relatively untouched area by combining the treatment of both evaluation and accountability from a managerial perspective. With increased interest in the concept that nonprofit organizations must be accountable, this topical volume fills a gap in the literature that postgraduates and scholars of business studies and management will find invaluable.
