language With this conception it may be seen that except for the practice in the handling and use of instruments and for showing certain standards of execution copying drawings does little more in the study as an art of expression of thought than copying paragraphs from a foreign book would do in beginning the study of a foreign language And it would appear equally true that good pedagogy would not advise taking up composition in a new language before the simple structure of the sentence is understood and appreciated that is working drawings would not be considered until after the theory of projection has been explained After a knowledge of the technic of expression the penman Ship and orthography the whole energy should be directed toward training in constructive imagination the perceptive ability which enables one to think in three dimensions to visualize quickly and accurately to build up a clear mental image a requirement absolutely necessary for the designer who is to represent his thoughts on paper That this may be accomplished more readily by taking up solids before points and lines has been demonstrated beyond dispute About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
