

9 Self check

Retrieve the error history of each unit using the remote controller.

- ① Switch to the self check mode.

When the **[CHECK]** button is pressed twice in succession within three seconds, the display shown below appears.

Self check address or self check refrigerant address

- ② Set the address or refrigerant address No. you want to self check.

When the **[TEMP. (V)]** and **[Δ]** buttons are pressed, the address decreases and increases between 01 and 50 or 00 and 15. Set it to the address No. or refrigerant address No. you want to self check.

Approximately three seconds after the change operation, the self check refrigerant address changes from flashing to a steady light and self check begins.

- ③ Self check result display <Error history> (For the contents of the error code, refer to the indoor unit installation manual or service handbook.)

Error code 4 digits or error code 2 digits

Error detection attribute

Address 4 digits or unit address No. 2 digits

When there is no error history

When opposite side does not add

- ④ Error history reset

The error history is displayed in ③ Self check results display.

When the **[Timer selection]** button is pressed two times successively within three seconds, the self check address or refrigerant address flashes.

When the error history was reset, the display shown below appears. When error history reset failed, the error contents are displayed again.

- ⑤ Self check reset

There are the following two ways of resetting self check.

Press the **[CHECK]** button two times in succession within three seconds → Resets self check and returns to the state before self check.

Press the **[ON/OFF]** button → Self check resets and indoor units stop.

(When operation is prohibited, this operation is ineffective.)

10 Remote Controller Check

- ① First check the power mark.

When normal voltage (DC12V) is not applied to the remote controller, the power mark goes off.

When the power mark is off, check the remote controller wiring and the indoor unit.

Power mark

- ② Switch to the remote controller check mode.

When the **[CHECK]** button is held down for five seconds or longer, the display shown below appears.

When the **[FILTER]** button is pressed, remote controller check begins.

- ③ Remote controller check result

When remote controller is normal

Since there is no problem at the remote controller, check for other causes.

When the problem is other than the checked remote controller

(Error code 2) "E3" "E603" "E632" flash → Cannot send

There is noise on the transmission line, or the indoor unit or another remote controller is faulty. Check the transmission line and the other remote controllers.

When remote controller is faulty

(Error display 1) "NG" flashes → Remote controller send/receive circuit abnormal

Remote controller switching is necessary.

(Error display 2) "ERC" and data error count are displayed → Data error generation

Data error count (Max 55 errors)

"Data error count" is the difference between the number of bits of remote controller send data and the number of bits actually sent to the transmission line. In this case, the send data was disturbed by the noise, etc. Check the transmission line.

When data error count is 0

Remote controller send data

Send data on transmission line

- ④ Remote controller check reset

When the **[CHECK]** button is held down for five seconds or longer, remote controller check resets and the "H0" and RUN lamp flash.

Approximately 30 seconds later, the remote controller returns to the state before remote controller check.
