Jan Gehl Cities For People:

Cities for People Jan Gehl, 2013-03-05 For more than forty years Jan Gehl has helped to transform urban environments around the world based on his research into the ways people actually use or could use the spaces where they live and work In this revolutionary book Gehl presents his latest work creating or recreating cityscapes on a human scale He clearly explains the methods and tools he uses to reconfigure unworkable cityscapes into the landscapes he believes they should be cities for people Taking into account changing demographics and changing lifestyles Gehl emphasizes four human issues that he sees as essential to successful city planning He explains how to develop cities that are Lively Safe Sustainable and Healthy Focusing on these issues leads Gehl to think of even the largest city on a very small scale For Gehl the urban landscape must be considered through the five human senses and experienced at the speed of walking rather than at the speed of riding in a car or bus or train This small scale view he argues is too frequently neglected in contemporary projects In a final chapter Gehl makes a plea for city planning on a human scale in the fast growing cities of developing countries A Toolbox presenting key principles overviews of methods and keyword lists concludes the book The book is extensively illustrated with over 700 photos and drawings of examples from Gehl's work around the globe

Cities for People Jan Gehl, 2013 **How to Study Public Life** Jan Gehl, Birgitte Svarre, 2013-12-04 How do we accommodate a growing urban population in a way that is sustainable equitable and inviting This question is becoming increasingly urgent to answer as we face diminishing fossil fuel resources and the effects of a changing climate while global cities continue to compete to be the most vibrant centers of culture knowledge and finance Jan Gehl has been examining this question since the 1960s when few urban designers or planners were thinking about designing cities for people But given the unpredictable complex and ephemeral nature of life in cities how can we best

design public infrastructure vital to cities for getting from place to place or staying in place for human use Studying city life and understanding the factors that encourage or discourage use is the key to designing inviting public space In *How to Study Public Life* Jan Gehl and Birgitte Svarre draw from their combined experience of over 50 years to provide a history of public life study as well as methods and tools necessary to recapture city life as an important planning dimension This type of systematic study began in earnest in the 1960s when several researchers and journalists on different continents criticized urban planning for having forgotten life in the city City life studies provide knowledge about human behavior in the built environment in an attempt to put it on an equal footing with knowledge about urban elements such as buildings and transport systems Studies can be used as input in the decision making process as part of overall planning or in designing individual projects such as streets squares or parks The original goal is still the goal today to recapture city life as an important planning dimension Anyone interested in improving city life will find inspiration tools and examples in this invaluable guide

People Cities Annie Matan, Peter Newman, 2016-11-15 Over the last 50 years architect Jan Gehl has changed the way that we think about architecture and city planning moving from the Modernist separation of uses to a human scale approach inviting people to use their cities *People Cities* tells the inside story of how Gehl learned to study urban spaces and implement his people centered approach in car dominated cities It discusses the work theory life and influence of Gehl from the perspective of those who have worked with him in cities across the globe It will inspire anyone who wants to create vibrant human scale cities and understand the ideas and work of the architect who has most influenced urban design

Life Between Buildings Jan Gehl, 2011-01-17 The first Danish language version of this book published in 1971 was very much a protest against the functionalistic principles for planning cities and residential areas that prevailed during that period The book carried an appeal to show concern for the people who were to move about between buildings and it urged an understanding of the subtle almost indefinable but definite qualities which have always related to the interaction of people in public spaces and it pointed to the life between buildings as a dimension of architecture that needs to be carefully treated Now 40 years later many architectural trends and ideologies have passed by over the years These intervening years have also shown that the liveliness and liveability of cities and residential areas continues to be a important issue The intensity in which fine public spaces are used at this point in time as well as the greatly increased general interest in the quality of cities and their public spaces emphasises this point The character of life between buildings changes with changes in any given social context but the essential principles and quality criteria to be employed when working with life between buildings has proven to be remarkably constant Though this work over the years has been updated and revised several times this version bears little resemblance with the very early versions however there was no reason to change the basic message Take good care of the life between your buildings

Historic Cities Jeff Cody, Francesco Siravo, 2019-07-30 This new volume in the GCI s Readings in Conservation series brings together a selection of seminal writings on the

conservation of historic cities This book the eighth in the Getty Conservation Institute's Readings in Conservation series fills a significant gap in the published literature on urban conservation This topic is distinct from both heritage conservation and urban planning despite the recent growth of urbanism worldwide no single volume has presented a comprehensive selection of these important writings until now This anthology profusely illustrated throughout is organized into eight parts covering such subjects as geographic diversity reactions to the transformation of traditional cities reading the historic city the search for contextual continuities the search for values and the challenges of sustainability With more than sixty five texts ranging from early polemics by Victor Hugo and John Ruskin to a generous selection of recent scholarship this book thoroughly addresses regions around the globe Each reading is introduced by short prefatory remarks explaining the rationale for its selection and the principal matters covered The book will serve as an easy reference for administrators professionals teachers and students faced with the day to day challenges confronting the historic city under siege by rampant development

Resilient Cities, Second Edition Peter Newman, Timothy Beatley, Heather Boyer, 2017-06 Drawing from research and examples about resilient cities this book looks at new initiatives and innovations cities can implement

Humanizing Cities Through Car-Free City Development and Transformation Doheim, Rahma M., Farag, Alshimaa Aboelmakarem, Kamel, Ehab, 2020-06-05 The heavy dependency on private cars has shaped the design of cities While offering fast comfortable and convenient commutes cars have become the most popular method of transportation but are also a health crisis due to the toxic emissions they release into the atmosphere as well as the high death toll from traffic accidents For these reasons there is a need to minimize the use of cars within cities in favor of greener and humanized urban design that would improve the quality of life and reduce the global threat of climate change Humanizing Cities Through Car Free City Development and Transformation is an essential publication that explores the concepts of car free cities and city humanization as possible solutions to reduce the deteriorating effect on the environment and the community The publication discusses the urban initiative to implement pedestrianization and humanization of cities and public spaces to promote the concept of car free living Featuring coverage on a wide range of topics including city humanization smart mobility and urban policies this book is ideally designed for urban planners environmentalists government officials policymakers architects transportation authorities researchers academicians and students

Urban Landscapes in High-Density Cities Bianca Maria Rinaldi, Puay Yok Tan, 2019-06-04 The positive effects of urban green spaces are well known ranging from the promotion of health support of biodiversity to climate regulation However the practical implementation of urban landscapes is less discussed How can we make these spaces functional economically feasible and inclusive especially as cities become more diverse The publication explores strategies to reconcile the various demands such as food production resilience and nature conservation Indeed urban landscapes have to be restorative ecological and aesthetically pleasing at the same time This is a particular challenge in high density cities like Singapore Seoul or New York where space is a scarce commodity The

continuing growth of the worldwide urban population imbues the topic with a special urgency **Soft City** David Sim, 2019-08-20 Imagine waking up to the gentle noises of the city and moving through your day with complete confidence that you will get where you need to go quickly and efficiently Soft City is about ease and comfort where density has a human dimension adapting to our ever changing needs nurturing relationships and accommodating the pleasures of everyday life How do we move from the current reality in most cities separated uses and lengthy commutes in single occupancy vehicles that drain human environmental and community resources to support a soft city approach In Soft City David Sim partner and creative director at Gehl shows how this is possible presenting ideas and graphic examples from around the globe He draws from his vast design experience to make a case for a dense and diverse built environment at a human scale which he presents through a series of observations of older and newer places and a range of simple built phenomena some traditional and some totally new inventions Sim shows that increasing density is not enough The soft city must consider the organization and layout of the built environment for more fluid movement and comfort a diversity of building types and thoughtful design to ensure a sustainable urban environment and society Soft City begins with the big ideas of happiness and quality of life and then shows how they are tied to the way we live The heart of the book is highly visual and shows the building blocks for neighborhoods building types and their organization and orientation how we can get along as we get around a city and living with the weather As every citizen deals with the reality of a changing climate Soft City explores how the built environment can adapt and respond Soft City offers inspiration ideas and guidance for anyone interested in city building Sim shows how to make any city more efficient more livable and better connected to the environment **Staging Urban Landscapes** B.

Cannon Ivers, 2018-10-08 Open urban spaces are an ideal stage for public events An important prerequisite for their design in an increasingly heterogeneous multicultural cityscape is the relationship between design use and social function The book documents both temporary as well as permanent installations of various kinds from the open air courtyard of a museum to the design of a river bank promenade through to a city park *Archinesia 10* Imelda Akmal, 2016-01-01 CITY PEOPLE and ARCHITECTURE No matter how impressive or iconic building or tall skyscraper is upon the skyline of a city these buildings are conceived with people as their users Yet the question is for which layer of citizenship do they serve Have the stakeholders of the built environment give adequate attention towards the lives of those in between the cities sprawl of structures The topic of Archinesia vol 10 is City People and Architecture in which we try to reassess the position of architectural projects apart from being iconic attractors in the cityscapes We ought to examine the role of architects in the ever crucial process of creation within an increasingly populous context Without understanding how architects impact people the profession will fatally disconnect itself from society BUILT PROJECTS and dramatin I L Residence Tangerang Studio TonTon JS House Jakarta RT Q Architects House of the Collector Semarang MSSM Associates by RSI Group The Monolithic House Semarang Eleena Jamil Architect Sepang House Sepang DCM Jakarta Alila Solo Samdoon Architects The Deck Phuket Vo Trong Nghia Roc Von

 turn around the estrangement we all feel Katrina Cavanough CEO The Kindness On Purpose Movement After decades of
 affluence we're now busy renovating our homes buffing and botoxing our bodies and losing ourselves in passive
 entertainment and shopping as depression and anxiety soars And with the arrival of Netflix and Uber Eats there's less and
 less incentive to leave home Could our constant need for connection be messing with our brains Is this why we're losing our
 ability to strike up a conversation with anyone we don't know And given that so many of our kids lack one on one attention
 and regular touch are we raising this new generation to be profoundly lonely Right now many of our relationships at home
 and at work as well as in our communities are struggling What then are the best ways back to belonging and what might a
