control the expression of genes and DNA replication The audience for this book is mainly newly established scientists and graduate students Rather than going into the more specific areas of recent research on chromatin the chapters in this book give a strong updated groundwork about the topic Some the fundamentals that this book will cover include the structure of chromatin and biochemistry and the enzyme complexes that manage it Motor ,1958 **The Biomarkers, Mechanism, and Therapeutic Strategies of Cancer Immunotherapy Resistance** Mou Peng, Xin Jin, Yunliang Gao ,Xiaoxin Ren,2025-07-30

Over the decades cancer immunotherapy has been a burgeoning science in medicine and an established pillar of therapeutic options for diverse cancer types Leading the way to success is mainly the discovery and development of immune checkpoint inhibitors ICIs and chimeric antigen receptor CAR T cell based therapies Under immunotherapy a portion of cancer patients enables to achieve a significant and durable remission with a longer survival time particularly in those with lung cancer melanoma genitourinary cancer etc However striking disparities still exist in the effectiveness of anticancer immunotherapy and cause a great challenge to select appropriate candidates A large part of cancer patients presents limited or no response to immunotherapy mainly attributable to immunotherapy resistance Despite of great strides already made the exact mechanism underlying immunotherapy resistance is still enigmatic Immunotherapy resistance is extremely complex and involves voluminous aspects such as tumor intrinsic factors aberrant expression of tumor antigens alterations of signaling pathways etc tumor extrinsic factors local tumor microenvironment etc and host related factors gender age etc More efforts should be made to characterize the underlying mechanism and uncover robust targets for a better response rate
