The Cambridge Primary Review Research Surveys Robin Alexander, Christine Doddington, John Gray, Linda Hargreaves, Ruth Kershner, 2012-08-06 The Cambridge Primary Review Research Surveys is the outcome of the Cambridge Primary Review England's biggest enquiry into primary education for over forty years. Fully independent of government, it was launched in 2006 to investigate the condition and future of primary education at a time of change and uncertainty and after two decades of almost uninterrupted reform. Ranging over ten broad themes and drawing on a vast array of evidence, the Review published thirty-one interim reports including twenty-eight surveys of published research provoking media headlines and public debate before presenting its final report and recommendations. This book brings together the twenty-eight research surveys specially commissioned from sixty-five leading academics in the areas under scrutiny and now revised and updated to create what is probably the most comprehensive overview and evaluation of research in primary education yet published. A particular feature is the prominence given to international and comparative perspectives. With an introduction from Robin Alexander, the Review's director, the book is divided into eight sections covering children's lives and voices, school, home and community, children's development, learning, diversity and needs, aims, values and contexts for primary education, the structure and content of primary education, outcomes, standards and assessment in primary education, teaching in primary schools, structures and processes, teaching in primary schools, training, development and workforce, reform, policy, frameworks, governance, funding, reform and quality assurance. The Cambridge Primary Review Research Surveys is an essential reference tool for professionals, researchers, students and policy makers working in the fields of early years, primary and secondary education.

Primary Mathematics for Trainee Teachers Marcus Witt, 2014-11-19 With chapter sequencing following the new Curriculum, this book supports trainee Primary school teachers to make use of the opportunities presented in the new National Curriculum for effective and engaging Mathematics teaching. Covering all of the areas of the new Curriculum for primary mathematics and offering insight into effective teaching, this book helps students connect what they need to teach with how it can be taught. Exploring opportunities in the new curriculum for creative and imaginative teaching, it shows readers how to capitalize on opportunities to develop children's reasoning and problem-solving skills. It explores how to make links between mathematics and children's lived experiences to enhance their learning and enables trainees to develop an ability to plan with discernment, making the most of existing thinking and research as well as building confidence in adapting and customizing ideas. Includes the full National Curriculum Programme of Study for Maths key stages 1 and 2 as a useful reference for trainee teachers. Other books in this series include **Primary English for Trainee Teachers** **Primary Mathematics: Teaching Theory and Practice** Claire Mooney, Mary Briggs, Mike Fletcher, Alice Hansen, Judith McCullouch, 2009-05-26 This invaluable coursebook is designed for all trainees working towards Qualified Teacher Status (QTS). Covering the essential skills of planning, monitoring and assessment and class management, it relates these specifically

to primary mathematics Separate sections examine management of mathematics learning and progression and misconceptions in mathematics topics The text is structured around the current curriculum and incorporates the Primary National Strategy Content is linked to the 2007 QTS Standards This fourth edition makes links with the Early Years Foundation Stage **The Parliamentary Debates (Hansard)**. Great Britain. Parliament. House of Lords,2009
