

Factoring Monomials From Polynomials

To factor a polynomial, write the polynomial as a product of other polynomials.

For example, $4x^2 - 8x$ can be written as $4x(x - 8)$.

$4x$ is the **Greatest Common Factor (GCF)** of $4x^2$ and $8x$.

$4x$ is a **Common Monomial Factor** of the terms of the binomial.

$x - 8$ is a **Binomial Factor** of $4x^2 - 8x$.

2. $16a^5b^3 + 32a^4b$

12. $9c - 3c^2$

3. $x^2 + x^4 + x^3$

13. $5x^4 - 12x^2$

Abstract The objective of the thesis is to compare polynomials and finite Blaschke products and demonstrate that they share many similar properties and hence we can establish a dictionary between these two kinds of finite maps for the first time The results for polynomials were reviewed first In particular a special kind of polynomials was discussed namely Chebyshev polynomials which can be defined by the trigonometric cosine function \cos Also a complete classification for two polynomials sharing a set was given In this thesis some analogous results for finite Blaschke products were proved Firstly Chebyshev Blaschke products were introduced They can be defined by replacing the trigonometric cosine function $\cos z$ by the Jacobi cosine function $\text{cd } u$ They were shown to have several similar properties of Chebyshev polynomials for example both of them share the same monodromy satisfy some differential equations and solve some minimization problems In addition some analogous results about two finite Blaschke products sharing a set were proved based on Dinh's and Pakovich's ideas Moreover the density of prime polynomials was investigated in two different ways i expressing the polynomials of degree n in terms of the zeros and the leading coefficient ii expressing the polynomials of degree n in terms of the coefficients Also the quantitative version of the density of composite polynomials was developed and a density estimate on the set of composite polynomials was given Furthermore some analogous results on the density of prime Blaschke products were proved DOI 10.5353/th_b4784971 Subjects Blaschke products Polynomials *Polynomials, Piece by Piece: Multiplying Polynomials: Expand with Confidence* Mike Csencsits, 2025-06-16 Master Polynomial Multiplication with Confidence and Clarity
