The lab manual contains over 45 exercises that were written to supplement the text. Among its features, the opening for each exercise ties the activity to the text material, identifies the relevant chapter objectives, and helps the student to connect the activity to working in the field. Early exercises include detailed descriptions of the circuit connections along with step by step assembly instructions, helping the student to build the circuits more quickly and efficiently. The circuit descriptions and assembly instructions become more general as students progress through the manual, moving them toward more independent lab activities. In the first half of the manual, circuit diagrams showing how the circuit elements are connected and how the circuit is tested are provided along with the circuit schematics, helping the students to make the connection between schematic diagrams and actual component layouts. The labs are intended for use with the Lab Volti EMS electromechanical systems line from Lab Volti Systems Inc, with test equipment available from other providers. However, all labs can be adapted to use similar manufacturers.
