Excerpt from *Laboratory Manual in Physical Geography* This Manual while prepared as a supplement to the text book *Elements of Physical Geography* by the author may be used with any other text book or with any lecture course The manner in which the subject is taught and the experiments performed is governed to some extent by the place it occupies in the school curriculum If it is in the third or fourth year of High School after the pupil has had experimental work in Chemistry or Physics the experiments need not be as elementary as if the pupil is doing his first laboratory work For this reason more experiments are given than would probably be performed by one class in a years work and the teacher can select from these the ones best adapted to the grade of pupils It is supposed that most teachers will have some experiments which they prefer to some in the Manual and which can be used as substitutes or as supplementary to those given Further the teacher is of course at liberty to change the wording of any of the experiments in any way that will adapt it the better to his class The Manual like the text book is intended only as a base on which the progressive teacher can build and is intended to be suggestive rather than mandatory In all the laboratory work the pupil should be put as far as possible in the attitude of an original investigator About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works      **Physical Geography** Andrew James Bach, Michael J.
