Abel, 1913 **Laboratory Manual for Anatomy and Physiology, with Fetal Pig Dissections** Patricia J. Donnelly, George A. Wistreich, 1993 The Estate House Re-designed Anthony Sully, 2018-08-07 The book demonstrates how new houses can be designed to be more sustainable and ergonomic. Specifically it describes a prototype building that could be constructed in the near future. Responding to some of the poor standards of mass estate housing in the UK and its out of date space standards it contributes towards improving the current status quo by describing a house design including drawings that can compete with today's mass housing. The author examines the traditional geometrical reliance on the square in the design of houses and the planning of housing estates and promotes instead the adoption of polygonal forms. This is explained using geometric analysis diagrams and references to existing housing. These concepts have been developed with reference to technical literature from various companies with one company interested in taking it further. Providing a novel and up to date design concept this book is of value to practitioners and researchers looking to improve the standard of mass housing in the UK. It is also of interest to anyone wishing to build their own house and to manufacturers wanting to move into modern housing technology. *Interactive Mathematics Program* Daniel M.
