## **Lacan And Religion Key Thinkers In The Study Of Religion:**

**Lacan and Religion** Aron Dunlap, 2016-06-16 The French psychoanalyst Jacques Lacan is one of the most influential intellectuals of the past century His work is invoked by philosophers film critics and feminist theorists but religious scholars have tended to keep their distance Whilst the religious dimensions of Freud and Jung have been investigated exhaustively much work still needs to be done in exploring this aspect of Lacan s thought Lacan and Religion presents students of religion and theology with a clear introduction to a famously difficult thinker The theological analysis is grounded in a solid understanding of Lacan s work as a psychoanalyst whilst the book also explores how Lacan s concepts can be fruitful for those who labour in what Lacan called the field of the divine Ernesto De Martino on Religion Dr. Fabrizio M.

Ferrari, 2014-09-11 Ernesto de Martino was a major critical thinker in the study of vernacular religions producing innovative analyses of key concepts such as folklore magic and ritual His methodology stemmed from his training under the philosopher Benedetto Croce whilst his philosophical approach to anthropology borrowed from Marx and Gramsci Widely celebrated in continental Europe de Martino s contribution to the study of religion has not been fully understood in the Anglophone world though some of his works Primitive Magic the Psychic Powers of Shamans and Sorcerers and The Land of Remorse a Study of Southern Italian Tarantism have been translated This volume presents a comprehensive overview of de Martino s life and work the thinkers and theories which informed his writings his contribution to the study of religions and the potential of his methodology for contemporary scholarship **The Routledge Companion to the Study of Religion** John

Hinnells, 2009-09-10 The Routledge Companion to the Study of Religion is a major resource for courses in Religious Studies It begins by explaining the most important methodological approaches to religion including psychology philosophy anthropology and comparative study before moving on to explore a wide variety of critical issues such as gender science fundamentalism ritual and new religious movements Written by renowned international specialists this new edition includes eight new chapters including post structuralism religion and economics religion and the environment religion and popular culture and sacred space surveys the history of religious studies and the key disciplinary approaches explains why the study of religion is relevant in today s world highlights contemporary issues such as globalization diaspora and politics includes annotated reading lists a glossary and summaries of key points to assist student learning *A Constructive Critique of Religion* Mia Lövhelm, Mikael Stenmark, 2020-02-06

Why do some strategies for critique of religion seem to be more beneficial for constructive engagement whereas others increase intolerance polarization and conflict Through an analysis of the reasons underpinning a critique of religion in institutional contexts of secular democratic societies A Constructive Critique of Religion explores how constructive interaction and critique can be developed across diverse interests It shows how social and cultural conditions shaping these institutions enable and structure a critical and constructive engagement across diverging worldviews A key argument running through the book is that to develop constructive forms of critique a

more thorough and systematic investigation of resources for criticism located within religious worldviews themselves is needed Chapters also address how critique of Islam and Christianity in particular is expressed in areas such as academia the law politics media education and parenting with a focus on Northern Europe and North America The interdisciplinary approach which combines theoretical perspectives with empirical case studies contributes to advancing studies of the complex and contentious character of religion in contemporary society

*The Split God* Nimi Wariboko, 2018-02-20 Offers a critical Pentecostal philosophy of God that challenges orthodox Christianity Although Pentecostalism is generally considered a conservative movement in The Split God Nimi Wariboko shows that its operative everyday notion of God is a radical one that poses under cover of loyalty a challenge to orthodox Christianity He argues that the image of God that arises out of the everyday practices of Pentecostalism is a split God a deity harboring a radical split that not only destabilizes and prevents God himself from achieving ontological completeness but also conditions and shapes the practices and identities of Pentecostal believers Drawing from the work of Slavoj Žižek Jacques Lacan Jean Luc Nancy and Giorgio Agamben among others Wariboko presents a close reading of everyday Pentecostal practices and in doing so uncovers and presents a sophisticated conversation between radical continental philosophy and everyday forms of spirituality By de particularizing Pentecostal studies and Pentecostalism Wariboko broadens our understanding of the intellectual aspects of the global Pentecostal and Charismatic movements Not since the early work of Thomas J J Altizer has a theologian philosopher opened such a radical new vision of reality with new language as Nimi Wariboko does in The Split God Through an analysis of Pentecostalism Wariboko creates a vivid shocking theology that self consciously repeats classical Christian orthodoxy in some of its modes while transforming it so as to make new sense of Pentecostal beliefs and practices He mines the language of contemporary continental critical theory of the psychoanalytical and Marxist sort for resources to express his claim that God is split not whole reality both spiritual and material is split not whole society is split not whole and persons are split not whole What Pentecostalism does he claims is to unite these split parts into vital ways of living in the face of God without making them holistically coherent just alive and vital

Scott, Paul S. Housley, 1991-09-30 The editors and contributors to this pioneering volume have focused the lense of geography on new territory as they inquire critically into the spatial dimensions of Judaism Christianity and Islam making this interdisciplinary project truly a new idea in the study of comparative religion and human geography Editors Jamie Scott and Paul Simpson Housley have organized the study into three broad areas of inquiry and have coined the term Geographics to encompass the three distinct yet interrelated spatial dimensions implicated in the study of religion The first area concerns the literal role played by specific sites regions or geographical phenomena in the development of the three religions The focus here is on city wilderness river valley and mountain as well as flood earthquake whirlwind and famine with attention devoted to methodological epistemological and ontological issues The symbolic or interpreted role played by these same specific entities in the three religions is the second notion to be explored The third focus is an inquiry into the geography of prophetic and apocalyptic visions and the role of geographical imagination in the development of religious self understanding This interface of natural and historical geography with the geography of the prophetic and apocalyptic imagination produces a graphic sometimes terrifying landscape The volume s nine essayists have approached their chapters with this threefold schematization in mind so that the book consists of one study devoted to each of these dimensions in Judaism Christianity and Islam as well as an introduction and afterword by the editors Each essay discusses the relationship of the spatial and the sacred in scripture and in subsequent literary and theological reflection upon scriptural themes The range of topics and variety of approaches used reflect the interpretive ambiguities that stem from the unique social political and economic functions conferred on places and spaces of particular significance in the life and thought of a religious tradition or community The section on Judaism explores Jewish agricultural settlements in Palestine the Temple Mount al haram al sharif and the Garden of Eden In depth looks at Finland women s geography and the apocalyptic world comprise the section on Christianity Iranian feasting and pilgrimage circuits modern Egypt and sacred geography are assessed in the final section on Islam This carefully edited innovative study offers a unique approach to the study of religion and will be read profitably by scholars and students of religion and geography **Programs and Courses** University of Northern Iowa, 2006 The Philosophical Review ,2000 *Choice* ,2005 **Encyclopedia of Christian Theology: A-F** Jean-Yves Lacoste, 2005
