2016 Li Yuming, Li Wei, 2022-11-07 China with the world's largest population numerous ethnic groups and vast geographical space is also rich in languages. Since 2006 China's State Language Commission has been publishing annual reports on what is called language life in China. These reports cover language policy and planning initiatives at the national, provincial and local levels, new trends in language use in a variety of social domains and major events concerning languages in mainland China, Hong Kong, Macau and Taiwan. Now for the first time these reports are available in English for anyone interested in Chinese language and linguistics. China's language education and social policies as well as everyday language use among the ordinary people in China. The invaluable data contained in these reports provide an essential reference to researchers, professionals, policy makers and China watchers. Science of Food Nutrition and Health Vinod Puri, 2023-07-21

Diet is one of the important facets of comprehensive approach to good health along with physical, social, emotional and intellectual well-being. During the second half of the 20th century we witnessed a dramatic change in our eating patterns and lifestyle aided by agricultural and industrial revolution, globalisation and urbanisation and emergence of associated diet-related chronic diseases such as obesity, coronary heart disease, hypertension, diabetes, some type of cancer, stroke and degenerative arthritis. The science of food and nutrition is very complex. Nutrition science like many other fields of science is evolutionary and there are always conflicting research outcomes that need to be carefully evaluated. We ingest hundreds of dietary components every day and understanding various metabolic pathways and the effect of interactions of various dietary components in vivo is rather challenging. Recent advances in genetic research fostered the emergence of new disciplines such as nutrigenomics, proteomics, metabolomics and transcriptomics which can shed light on the molecular level interaction between dietary nutrients and the genome. These technologies provide the vision for future nutrition research that may unravel how the diet-genome interactions modify the phenotype. Food may not be the overall cure for the treatment of every possible disease but the importance of food in both causing and relieving certain problems cannot be neglected. This is one of the most researched topics and there is a lot written about it. However, this book is probably the only text that provides up-to-date information on the various interrelated topics on food and nutrition that would be of interest to wider community.

Cell Biology, Physiology and Molecular Pharmacology of G protein Coupled Receptors Sameer Mohammad, Muheeb Beg, Manveen Kaur Gupta, 2022-01-28 Safety evaluation of certain food additives World Health Organization, Food and Agriculture Organization of the United Nations, 2022-05-26 This publication by the World Health Organization and the Food and Agriculture Organization of the United Nations presents the safety evaluation of certain food additives. It is based on data reviewed at the eighty-ninth meeting of the Joint FAO/WHO Expert Committee on Food Additives (JECFA). The book contains monographs summarizing the committee's assessment of various food additives and flavoring agents evaluating their safety for human consumption. The evaluations are conducted using proprietary and published scientific data and are meant to
