Principles and Methods of Pocket Park Planning and Design Conghui Zhou,2025-07-31 This book focuses on the planning and design methods of pocket parks in the disciplines of urban planning and landscape architecture It fills the gap in the current pocket park planning by innovatively exploring the service mechanism and planning methods of the pocket parks to alleviate the scarcity of outdoor recreational spaces in the high density environments This book integrates the results of previous research and our latest research results Taking urban renewal as the planning scenario the book systematically introduces the basic characteristics of mini parks planning principles and methods and development promotion and assurance strategies This book is used as a textbook for planning and design courses as well as a professional reference book for urban planners and landscape architects The authors have also made great efforts to use simple language and a large number of visual illustrations in the text Through these approaches the authors expected that the publication of this book would not only facilitate teaching and practical application but also attract more interest and attention from ordinary people and motivate them to actively participate in the planning design and management of mini parks around them Only when this goal is achieved can the original value of mini park development be finally realized *Abstract Journal in Earthquake Engineering* ,1993 **Accessible Tourism** Dimitrios Buhalis,Simon Darcy,2011 Inclusion disability an ageing population and tourism are increasingly important areas of study due to their implications for both tourism demand and supply This book therefore sets out to explore and document the current theoretical approaches foundations and issues in the study of accessible tourism In drawing together the contributions to this volume the editors have applied broader social constructionist approaches to understanding the accessible tourism phenomena Accessible tourism as with any area of

academic study is an evolving field of academic research and industry practice As with other areas of tourism the field is multidisciplinary and is influenced by various disciplines including geography disability studies economics public policy psychology and marketing As one would expect from two scholars at the height of their academic abilities Dimitrios Buhalis and Simon Darcy have delivered a timely and much needed contribution to the under served area of accessible tourism Harnessing the best conceptual developments on the topic Accessible Tourism is a scholarly yet hugely readable collection and readily communicates the various contributors passion for and command of their subject This collection is a must have text for anyone engaged in the theory practice and policy of accessible tourism and will be essential reading on undergraduate and postgraduate courses across a range of disciplines and fields I cannot speak highly enough of this endeavour and I m sure it will take accessible tourism and universal design debates into the mainstream of academic enquiry and industry practice Professor Nigel Morgan The Welsh Centre for Tourism Research University of Wales Institute Cardiff Wales
