Main Idea Stories For Fourth Grade:

Get Ready! For Standardized Tests : Reading Grade 4 Kris Callahan, Carol Turkington, 2001-07-03 Schools in 45 states now administer annual standardized tests designed to gauge children's proficiency in reading and in many cases to determine who gets promoted and who doesn't. These latest volumes in the critically acclaimed Get Ready For Standardized Tests series arm parents with proven tools and techniques to help assess their children's basic reading skill levels, pinpoint their specific problem areas, reinforce their proficiency, gauge their progress, and instill them with the confidence and test-taking know-how needed to shine on virtually any standardized test. CRACKING THE FOURTH GRADE (READING MATH) Christian Camozzi, Athlene Whyte-Smith, Princeton Review, 2008-05-06 Guides and instructs both students and parents on the basics of reading and mathematics for the fourth grade, including exercises and practice tests and how to use the exercises in the book effectively. *Curriculum Development for Students with Mild Disabilities* Carroll J. Jones, 2010 Many teachers of students with mild disabilities experience difficulty writing IEPs and they lack a foundation in the regular education curriculum of academic skills and sequences associated with each grade level. This book was designed to provide this foundation. Presented in the form of scope and sequence charts that can be used as objectives for the State Frameworks goals and benchmarks, this resource assists in preparing IEPs, including the new process of identification of children with disabilities through their responses to intervention RTI. An additional focus is on the impact of federal laws IDEA and NCLB on the curriculum and assessment in schools today. The book has been reorganized into ten chapters, including historical perspectives, early childhood special education curricula, oral expression curricula, reading and listening curricula, written expression curricula, mathematics curricula, educational technology curricula, K-12 social and self-competence curricula, science curricula, and evaluation reports, case studies, Appendix. The scope and sequence charts were modified to include current national education standards and benchmarks and the skills in each of the academic areas that require annual state assessment. These charts will assist teachers in modifying the general education curriculum for students with mild disabilities and to write complete Individual Education Programs using age-appropriate and developmentally appropriate teaching and assessment materials. Chapter summaries included for review purposes also serve as selective and motivational reading. With special education teachers in short supply and the demands on their time so great, this book will provide a valuable resource for cutting the clutter and moving to the heart of the teaching process, determining what skills students need to move effectively to the next level.
