**Dutton's Orthopedic Survival Guide: Managing Common Conditions** Mark Dutton, 2011-02-28. The ideal handbook for Physical Therapy students going through orthopaedic clinic rotations with step by step guidelines and a convenient size. Market Audience: Primary Market 30 000 Physical Therapy students in the US. Secondary 155 000 practicing Physical Therapists. About the Book: Physical Therapy students spend a lot of time on clinical rotations learning how to treat the most common orthopaedic conditions. Presently there is no pocket sized handy reference that will guide them through rotations and help prepare them for practice. Clinical Companion: Managing the Most Common Orthopaedic Conditions is that book. To date the competition has been bulky textbooks that are comprehensive but far too big to carry on rotations. This will not be a spin off of Dutton's larger Orthopaedic text but a practical guide with unique content that students will want. Small in size but comprehensive in content it will contain everything the student needs to diagnose and treat the most commonly seen conditions. With introductory chapters to prep students for treating patients, the book will progress to four Sections covering the conditions: The Upper Quadrant, The Lower Quadrant, The Spine and Systemic Conditions. We will also make videos available to users of the book via the Dutton Orthopaedics OLC. Key Selling Features: Case studies at the end of each section to enhance the decision making process for students. Q & A will test student's ability to determine the stage of healing, decide the best course of treatment and evaluate results throughout the patient's care. Focusing on the 50 most common orthopaedic conditions treated by Physical Therapists, this will be the first handbook sized reference designed specifically for students on clinical rotation.

**Author Profile:** Mark Dutton, PT, Allegheny Hospital, West Penn Allegheny Health System, WPAHS. Adjunct Clinical Assistant Professor, Duquesne University School of Health Sciences, Pittsburgh, PA. Mark Dutton, Bradfordwoods, PA, is an accomplished author who will ensure quality, consistency and timeliness to this work. His career as a practicing Physical Therapist and Adjunct Assistant Professor helps keep him abreast of advances in the field and gives him an ability to translate that to the educational field. His book *Orthopaedic Examination, Evaluation and Intervention* now in its

second edition has been very successful in the PT market as has his new title McGraw Hill s National Physical Therapy Exam published in March 2009 has also been well received In addition to his impressive skills and experience he is also a can do author who will submit manuscript on time and create questions and quality video assets for this work Review The following is a review of Dutton s second edition of Orthopaedic Examination Evaluation and Intervention 2 08 5 STAR DOODY S REVIEW Major areas in orthopedics including anatomy kinesiology and biomechanics of movement are covered along with a healthy dose of pathology that impacts patient function Clinical pearls appear in highlighted boxes throughout and camera icons indicate where video clips should be viewed This second edition is more comprehensive than the first Overall this is a valuable reference that achieves a nice balance between detailing examination and treatment Other books tend to be limited to addressing only one of these areas but not both This combination makes the book unique Doody s      **The Chiropractic College Directory** Kevin P. McNamee, Karen Magarian, I. D. Doultter, Russel Gibbons, Thomas F. Bergman, 1994-03

**Rehabilitation and Physical Therapy** David Levine, 2005 Physical rehabilitation is a burgeoning area in veterinary medicine and the Clinics has not covered this area before Saunders book authors Levine and Millis have focused this issue on clinical applications by offering chapters on rehabilitation of the neurologic patient the athletic dog and the medical care patient Additional chapters will cover orthotics physical agent modalities and manual therapies
